Data supplement

Table DS1 Structural equation model, and test of differences in the magnitude of regression coefficients, for the effects of maltreatment on internalising *v.* externalising dimensions within two randomly split halves per gender in the National Epidemiologic Survey on Alcohol and Related Conditions (NESARC) sample

	Sample 1							Sample 2						
		Association between internalising and each maltreatment		Association between externalising and each maltreatment		Test of difference			Association between internalising and each maltreatment		Association between externalising and each maltreatment		Test of difference	
	n	β (s.e.)	*P*	β (s.e.)	*P*	χ^2 (d.f.)	*P*	*n*	β (s.e.)	*P*	β (s.e.)	*P*	χ^2 (d.f.)	*P*
