Table of Contents

A Ethics and Data Availability	2
B Summary Statistics	6

List of Figures

1	Violence against politicians with and without an immigrant background	15
2	Violence against women and men with and without an immigrant background	17
3	Type of migration background and violence	21
A1	Share of politicians and citizens with and without a foreign background in 2010 and 2014	3
A2	Regions of origin among foreign-born politicians and population in 2010 and 2014	4
A3	Difference in violence exposure between politicians with and without immigrant backgrounds, across municipalities	5

List of Tables

1	Five forms of violence against politicians	13
2	Considering leaving politics because of violence	24
A1	Summary statistics	6
A2	Corresponds to Figure 1: Violence against politicians with and without an immigrant background	7
A3	Logit estimations	8
A4	Count measure of the number of forms of violence experienced	9
A5	Corresponds to Figure 2 – Violence against women and men with and without an immigrant background	10
A6	Gender and foreign background interaction	11
A7	Corresponds to Figure 3: Violence against politicians by type of migration background	12
A8	Municipality types	13
A9	Share of foreign born in the municipality	14
A10	Considering leaving politics; gender and type of migration background	15
A11	Considering leaving politics, violence exposed politicians, only	16
A12	Considering leaving politics, non-violence exposed politicians, only	17

A Ethics and Data Availability

Ethical approval for this study was received on August 11, 2017 from the regional Ethical Review Board in Uppsala, Sweden.

The data used in this study is individual level information obtained from The Swedish National Council for Crime Prevention.⁸ Due to the sensitive nature of the topic of political violence in the survey questions, and given that some information in the survey comes from the administrative registers, we are under strict contractual obligation not to disseminate these raw data to other individuals. Interested readers can apply for permission to purchase the data directly from the National Council for Crime Prevention,⁹ and can seek permission from the Swedish Ethical Review Authority.¹⁰

⁸ See <https://bra.se/bra-in-english/home/publications/archive/publications/2021-10-28-the-politicians-safety-survey-2021.html>.

⁹ See <https://bra.se/bra-in-english/home/about-bra.html>.

Figure A1: Share of politicians and citizens with and without a foreign background in 2010 and 2014

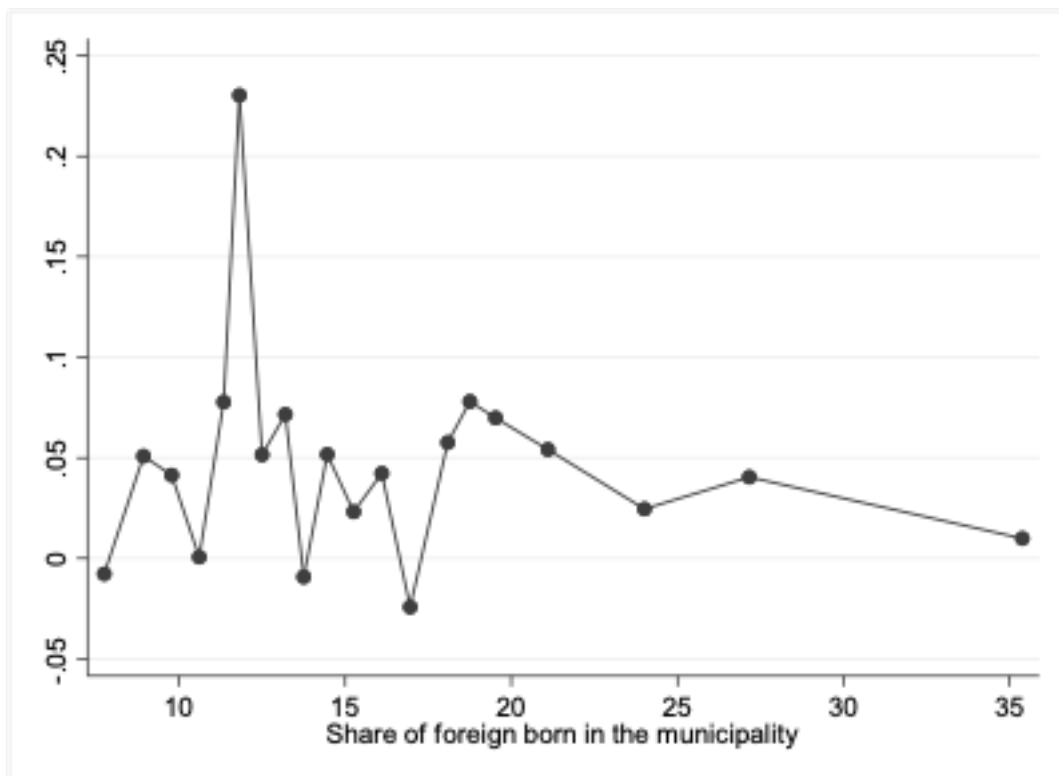

Notes: The share of foreign born, Swedish born, and parents' birthplace among the population and among politicians is based on the authors' calculations of Swedish registry data.

Figure A2: Regions of origin among foreign-born politicians and population in 2010 and 2014

Notes: The figure displays the share of citizens from each region in 2010 and 2014, and the share of politicians elected in 2010 and 2014 from each region. The statistics represent the authors' calculations of Swedish registry data.

Figure A3: Difference in violence exposure between politicians with and without immigrant backgrounds, across municipalities

Notes: The Figure reports the size of the difference in violence exposure between politicians without an immigrant background (the zero-line) and politicians with an immigrant background. We estimate the size of this difference across municipalities with different shares of foreign born in the population. The estimates are adjusted for our full model as described in Table A2

B Summary Statistics

Table A1: Summary statistics

	PTU Share (N)	Population Share (N)
<i>Wave</i>		
2012	0.35(8, 135)	0.33(12, 780)
2014	0.34(7, 934)	0.33(12, 780)
2016	0.31(7, 383)	0.33(12, 700)
<i>Party (pooled for three yrs)</i>		
Left party	0.06(1, 306)	0.06(2, 308)
Social Democrats	0.35(8, 269)	0.33(12, 480)
Green party	0.06(1, 311)	0.05(1, 859)
Centre party	0.12(2, 754)	0.12(4, 425)
Christian Democrats	0.04(1, 000)	0.04(1, 706)
Liberals	0.06(1, 520)	0.06(2, 109)
Moderate party	0.21(4, 875)	0.19(7, 266)
Sweden Democrats	0.06(1, 490)	0.12(4, 454)
Other party	0.04(927)	0.04(1, 653)
<i>Gender</i>		
Women	0.41(9, 697)	0.44
Men	0.59(13, 755)	0.56

Observations	23,405	23,405	23,405	23,405	23,405	23,405	23,405
R-squared	0.108	0.054	0.046	0.081	0.058	0.084	0.109

Notes: This table reports the share of politicians with an immigrant background (foreign born or with foreign born parents) exposed to violence during the previous year, compared to politicians without an immigrant background. The Constant reports the average share of politicians without an immigrant background who were exposed to violence. The coefficient for Immigrant background can be interpreted as reporting the difference between politicians with and without an immigrant background in percentage points. Control variables are defined as in Table 2 in the main manuscript. Data from PTU 2012, 2014 and 2016. Standard errors clustered at 290 municipalities. *** p<0.01, ** p<0.05, * p<0.1.

Table A3: Logit estimations

	(1) Violence	(2) Considered Leaving Politics
Immigrant background	0.302*** (0.055)	0.554*** (0.090)
Young	0.777*** (0.072)	0.670*** (0.121)
Newcomer	-0.184*** (0.048)	-0.151* (0.083)
Woman	0.156*** (0.044)	0.337*** (0.075)
FE for hierarchical position, rank-and-file as reference category		
<i>Committee chair</i>	0.777*** (0.072)	0.670*** (0.121)
<i>Mayor</i>	-0.184*** (0.048)	-0.151* (0.083)
FE for 3 years	YES	YES
FE for 8 political parties	YES	YES
FE for 290 municipalities	YES	YES
Constant	-1.234*** (0.083)	-3.578*** (0.134)
Observations	23,405	21,533

Notes: Column 1 replicates column 1 in Table A2 using logit estimation instead of OLS. Column 2 replicates column 1 in Table 2 in the main manuscript, using logit estimation instead of OLS.

Table A4: Count measure of the number of forms of violence experienced

Zero-inflated negative binomial	
<i>Count stage</i>	
Immigrant background	1.29*** (.079)
Woman	1.069 (.054)
Newcomer	.835*** (.048)
FE for hierarchical position, rank-and-file as reference category	
<i>Committee Chair</i>	1.33*** (.079)
<i>Mayor</i>	1.99*** (.144)
FE for parties	YES
FE for years	YES
Constant	.773** (.085)
<i>Inflation stage</i>	
Immigrant background	-.228** (.103)
Woman	-.170** (.083)
Newcomer	.142 (.103)
FE for hierarchical position, rank-and-file as reference category	
<i>Committee Chair</i>	-1.084*** (.119)
<i>Mayor</i>	-16.138*** (1.730)
FE for parties	YES
FE for years	YES
Constant	.102 (.220)
Observations	23,405
Non-zero observations	5,494
Alpha	1.368

Notes: Estimates in the count equation report incidence rate ratios, i.e. the relative number of violence incidents experienced in a year. The model is zero inflated, and the inflation stage reports a logit estimation of the probability to be exposed to zero forms of violence. The same independent variables are included at both stages as they are expected to negatively affect the probability of being exposed to zero forms of violence, as well as positively affect the probability of being exposed to a higher number of forms of violence. Municipality clustered standard errors in parentheses. *** p<0.01, ** p<0.05, * p<0.10
