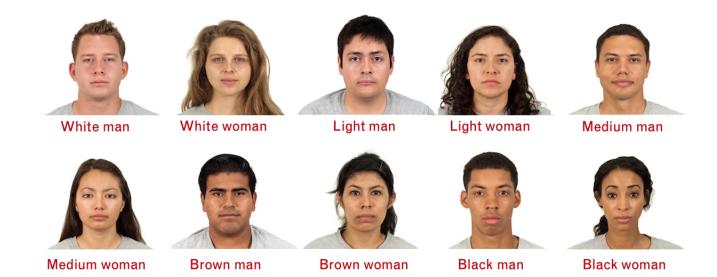

Figure A2: Image variations presented to respondents

#### Image details

The first category of photos, which are meant to represent the lightest Latinos, were rated as White between 88-100 percent of the time and rated as Latino about 0 percent of the time. The second category of photos were rated as Latino between 25 and 35 percent of the time and as White around 50 percent of the time. The third category of photos were rated as Latino about 50 percent of the time, multiracial about 30 percent of the time, and Asian about 10 percent of the time. The fourth category of photos were rated Latino between 77 and 83 percent of the time, multiracial about 10 percent of the time, and Asian slightly less than 10 percent of the time. The fifth category of photos were rated as Black between 60-73 percent of the time, as multiracial between 23 and 35 percent of the time, and Latino close to 3 percent of the time.

#### Conjoint profile restrictions

Higher-skilled professions, such as doctor, teacher and IT professional, are restricted to only appearing with at least the level of education that is required for that position (i.e. a doctor must have an advanced degree, whereas teachers must have a bachelor's degree or higher). Being born in the United States (which includes four distinct background attributes) is restricted from appearing with not speaking English at all, and it is also restricted from appearing with speaking limited English when the profile showed a bachelor's degree or higher. Undocumented, legal and naturalized immigrants are restricted from appearing with the "only speaking English" category of language ability. Furthermore, for those who were born in the U.S., I also restrict them from speaking limited English if they had a bachelor's or advanced degree.

 $Dependent \ variable = Differences \ in \ American \ rating. \ Original \ variable \ is \ rescaled \ from \ 0 \ to \ 1 \ before \ calculating \ difference \ between \ White \ and \ Black \ respondents. \ Standard \ errors \ are \ clustered \ by \ respondent. \ Weights \ are \ included \ in \ the \ model.$ 

Table A7: Attribute Salience for White and Black Respondents (Corresponds to Left Panel of Figure 3)

Attribute	White	Black	$\operatorname{sig}$
Faces	0.02	0.03	
Identifies	0.02	0.02	
Religion	0.01	0.01	
Background	0.12	0.07	*
Language	0.11	0.08	*
Spouse	0.01	0.00	
Education	0.03	0.02	
Profession	0.04	0.02	
Political	0.01	0.03	*
Observations	15000		

Attribute salience is calculated by taking the difference between the likelihood of choosing a profile as the most American profile with a given level of that attribute, and subtracting it from 50 percent, which would indicate that selection on this characteristic is purely random. The average difference across all levels of that attribute is calculated to compile the salience shown on this table. Whether the differences between the two groups are significant is calculated using alpha = 0.05.

Table A8: Difference in Attribute Salience Between White and Black Respondents (Corresponds to Right Panel of Figure 3)

Dependent variable = Differences in American rating. Original variable is rescaled from 0 to 1 before calculating difference between Black respondents who strongly identify with their racial identity vs. those who do not. Standard errors are clustered by respondent. Weights are included in the model.

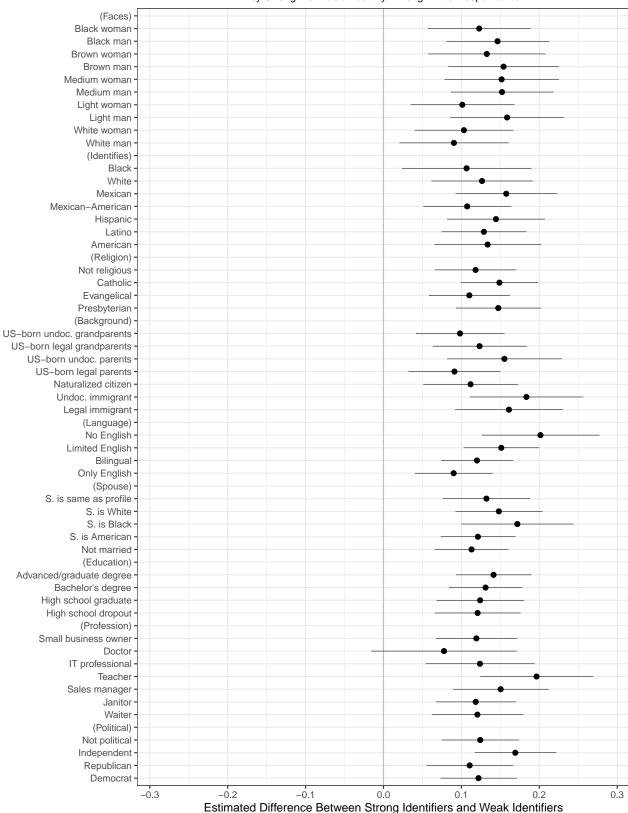

Marginal Mean Differences in Perceived Americanness by Strength of American Identity Among Black Respondents

Figure A3: Marginal mean differences between Black respondents who strongly identify with their American identity vs. those who do not. Corresponds to table A11.

Table A11: Marginal Mean Differences of Perceived Americanness, By American Identity Attachment Among Black Respondents (Corresponds to Figure A3)

Dependent variable = Differences in American rating. Original variable is rescaled from 0 to 1 before calculating difference between Black respondents who strongly identify with their American identity vs. those who do not. Standard errors are clustered by respondent. Weights are included in the model.

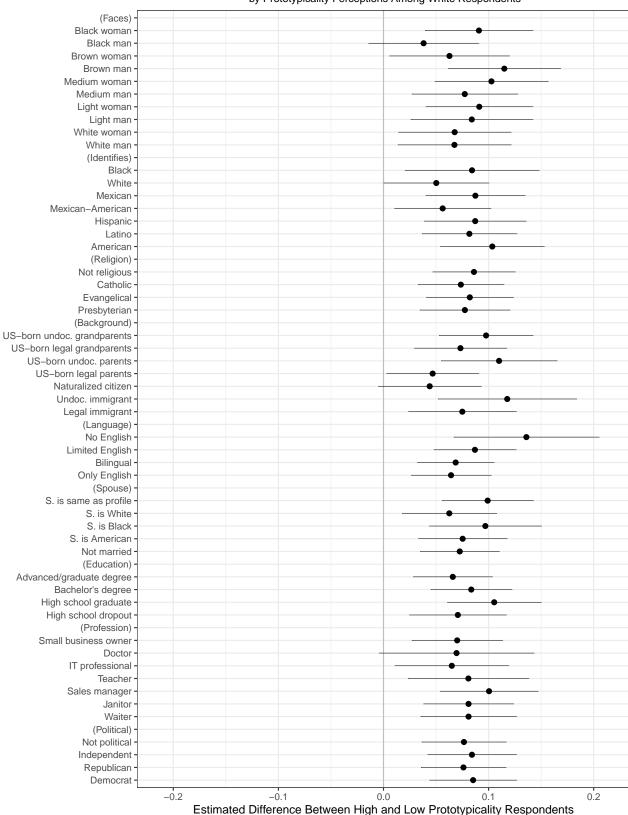

#### Marginal Mean Differences in Perceived Americanness by Strength of Racial Identity Among White Respondents

Figure A4: Marginal mean differences between White respondents who strongly identify with their racial identity vs. those who do not. Positive values indicate more negative ratings among strong identifiers. Corresponds to table A12.

Table A12: Marginal Mean Differences in Perceived Americanness by Strength of Racial Identity Among White Respondents (Corresponds to Figure A4)

Observations	7452			

Dependent variable = Differences in American rating. Original variable is rescaled from 0 to 1 before calculating difference between Black respondents who perceive themselves to be prototypical Americans vs. those who do not. Standard errors are clustered by respondent. Weights are included in the model.

Marginal Mean Differences in Perceived Americanness by Immigration History Among All Respondents

Figure A7: Marginal mean differences between those with immigration history (immigrants or children of immigrants) and without immigration history. Negative values indicate more positive ratings among those with a history of immigration. Corresponds to table A15.

Table A15: Marginal Mean Differences in Perceived Americanness by Immigration History Among All Respondents (Corresponds to Figure A7)

# .B Survey Instrument

# .B.1 Beginning Screen

# Introduction

### 2020 Survey of Political Opinion

Thank you for volunteering to participate in this survey. This study is being conducted to understand the political opinions of people in the United States. Your responses will be kept confidential and no identifying information will be connected to your survey.

Participation will take approximately 15 minutes. You can choose whether or not you want to be in this study, and you may choose to stop participating at any time.

If you have any questions or comments regarding this study, please contact the investigator (Email address)

# Agreement

Please confirm that you agree to participate below. You may print a copy of this page for your records. Clicking on the agree button indicates that:

- (1) You have read the above information
- (2) You voluntarily agree to participate
- (3) You are 18 years of age or older

# .B.2 Conjoint

First, we are going to show you a series of profiles of individuals living in the U.S. Please evaluate each profile, and then answer the following questions according to your personal beliefs, even if those do not necessarily align with beliefs that you think are commonly held by others.

(Two profiles are given)

These two people are either immigrants or come from a family with a history of immigration. If you had to choose between them, which of them do you personally believe **is more American**?

On a scale from 1 to 7, where 1 indicates that you would not rate this person **as American** at all and 7 indicates that you would very much rate this person as American, how would you rate each person?

On a scale from 1 to 7, where 1 indicates that you would not want this person **as your friend** at all and 7 indicates that you would very much want this person to be your friend, how would you rate each person?

### .B.3 Social Contact

Thinking of the neighborhood you live in, about how many people are from each group?

Table A20:	Neighborhood
------------	--------------

Category			Respon	se
Category	None	Some	Many	All or majority
Black or African American				
White				
Asian or Pacific Islander				
Hispanic or Latino				

Thinking of your current or most recent workplace, about how many people were from each group?

Table	A21:	Workplace
-------	------	-----------

Category			Respon	se
Category	None	Some	Many	All or majority
Black or African American				
White				
Asian or Pacific Islander				
Hispanic or Latino				

#### Thinking of your ten closest friends, about how many are from each group?

Catagory	Response				
Category	None	Some	Many	All or majority	
Black or African American					
White					
Asian or Pacific Islander					
Hispanic or Latino					

Table A22: Friends

#### .B.4 American Identity

# How much do you personally value each of these characteristics when considering if someone is truly American?

Category	Response				
Category	A lot	A Moderate Amount	A Little	Not At All	
Being born in America					
Having American citi-					
zenship					
Carrying on the cul-					
tural traditions of					
one's ancestors, such					
as language and food					
Being white					
Respecting America's					
institutions and laws					
Being informed about					
local and national pol-					
itics					

Table A23: American identity questions part 1

How much do you personally value each of these characteristics when considering if someone is truly American?

Catagony	Response				
Category	A lot	A Moderate Amount	A Little	Not At All	
Having European an-					
cestors					
Pursuing economic					
success through hard					
work					
Thinking of oneself as					
American					
Blending into the					
larger society					

Table A24: American identity questions part 2

How much do you personally value each of these characteristics when considering if someone is truly American?

Catagony	Response				
Category	A lot A Moderate Amount		A Little	Not At All	
Being Christian					
Being able to speak					
English					
Respecting other peo-					
ple's cultural differ-					
ences					
Seeing people of all					
backgrounds as Amer-					
ican					
Letting other people					
say what they want,					
no matter how much					
you disagree with					
them					

Table A25: American identity questions part 3

#### .B.5 Identity Importance

#### How much do you agree with the following statements?

Category	Response				
	A lot	A Moderate Amount	A Little	Not At All	
Being an American is					
an important part of					
my identity					
Being is an important					
part of my identity.					
I consider myself to be					
a typical American					

 Table A26:
 Identity importance questions

# .C Ethics

This project adheres to APSA's Principles and Guidance for Human Subjects Research. This project was approved as exempt from review by the Institutional Review Board, due to minimal risk to participants. Respondents were invited to take a survey on their political attitudes and opinions by YouGov. Participants read a consent form informing them about the study, and they provided their consent before beginning the survey. The researcher did not provide direct compensation to participants. YouGov gives respondents points in exchange for taking surveys, which they can redeem for rewards such as gift cards. Respondents were also informed at the end of the study that every profile they were presented with was fictional.
