*Notes:* 1 = We are missing the necessary data to compute the incumbency rate for this election. 2 = Either this election or the preceding election was not held under democratic rule (according to Polity) and is thus excluded from our analysis. 3 = In 2007, Ecuador's national legislature changed from the National Congress to the Constituent Assembly. We choose to include this election but find similar results if it is excluded. For data sources, W = Collected by downloading files or scraping data from the official websites of country legislatures (current or archived via the Internet Archive Wayback Machine).

Table A2: Operationalization of Our Independent Variables

Variable	Description	Data Source
Legislative Resources Index	Gives equal weight to the four components below, rescaled to be a 0–100 scale	Authors
Number of Committees	Number of substantive, permanent committees	Authors
Staff per Legislator	Number of full-time, permanent staff divided by the number of MPs	Authors
Multiple Committees	Equal to 1 if a member can commonly serve on more than one committee and 0 otherwise	Authors
log(Salary/GNI per Capita)	Guaranteed minimum salary of an MP divided by the gross national income per capita	Authors
Corruption	Scores countries by their perceived levels of corruption from 0 (extremely clean) to 100 (extremely corrupt)	Transparency International (2000–2018, reverse scale of Corruption Perceptions Index)
<b>Control Variables</b>		
Bicameral	Equal to 1 if a country has a bicameral legislature and 0 if it has a unicameral legislature	IPU (2019)
Presidential	Equal to 1 if a country has a presidential system and 0 if a parliamentary or semi-presidential system	Elgie (2019)
Federal	Equal to 1 if a country has a federal system and 0 if it has a unitary system	IPU (2019)
ICPV	Incentive to Cultivate a Personal Vote index, which ranges from 1 to 12	Carey and Shugart (1995), Johnson and Wallack (2012), Authors
log(GDP per Capita)	GDP per capita (current US\$), lagged 1 year	IMF (2019)
GDP Growth	Annual percentage change in real GDP growth, lagged 1 year	IMF (2019)

*Notes:* Data sources listed as “Authors” involve original data collection by scraping the official websites of country legislatures, direct contact with national legislative staff, and direct contact with country experts.

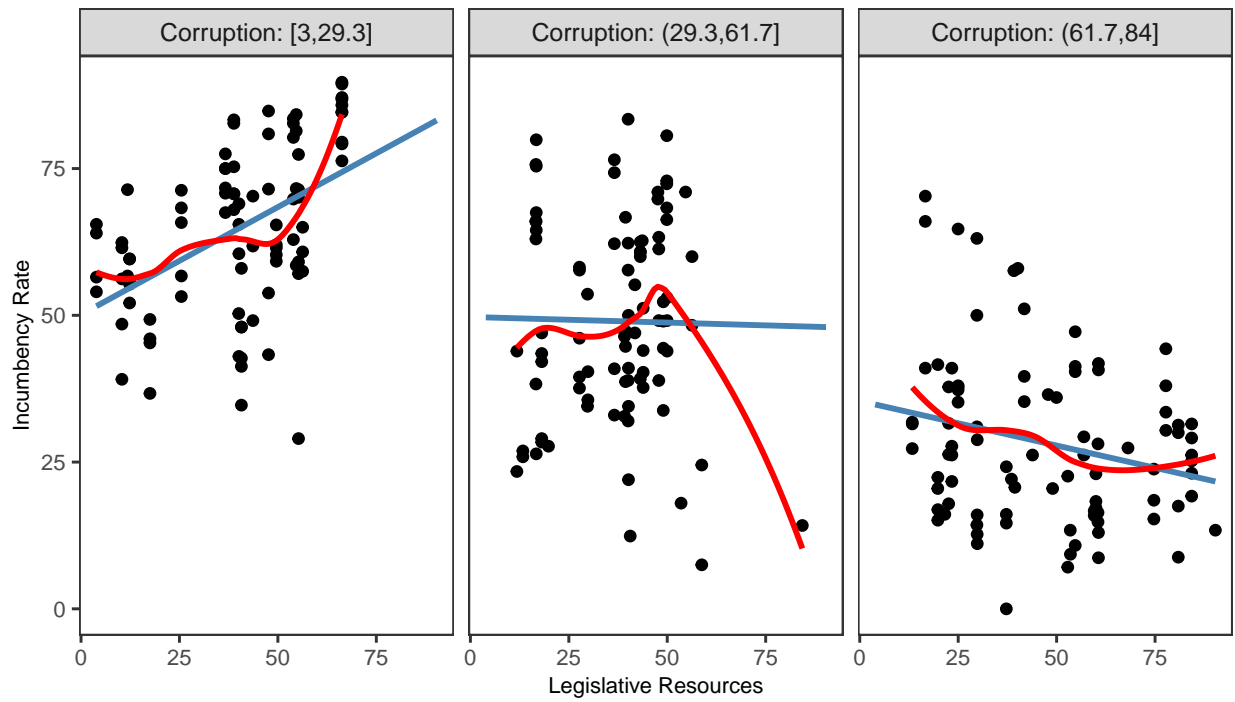

Figure A1: Marginal Effect of Corruption on Incumbency Rate by Legislative Resources

Notes: Marginal effects plot is generated using Model 4 in Table 1 and the `interflex` R package (Hainmueller, Mummolo, and Xu 2019).

Figure A2: Raw Data for Figure 2

Notes: Raw data plot is generated using the `interflex` R package (Hainmueller, Mummolo, and Xu 2019).

Figure A3: Binning Estimator for Figure 2

Notes: Marginal effects plot with binning estimator is generated using Model 4 in Table 1 and the *interflex* R package (Hainmueller, Mummolo, and Xu 2019).

Figure A4: Legislative Word Count and Legislative Resources

*Notes:*  $\log(\text{Legislative Word Count})$  is the natural logarithm of the number of words in the constitution that discuss the lower or unicameral chamber of the legislature.
