

Stormer, H.G., Pike, E.M., Sperling, F.A.H., Proctor, H.C. 2025. Distribution and diversity of terrestrial isopods (Isopoda: Oniscidea) in Canada, including new records and a species checklist. The Canadian Entomologist.

Supplementary material, Fig. S4

Figure S2. Maximum likelihood phylogeny of peracarid CO1 sequences made with the GTR+G+I substitution model, including both terrestrial and aquatic isopods, the amphipods *Gammarus lacustris* and *Melita nitida*, and the mysid *Hemimysis margalefi*. Numbers above the nodes indicate bootstrap support, and lines are coloured by bootstrap support for each clade (low support = red, well-supported = green). Nodes with < 0.40 (40%) bootstrap support are collapsed. *Nagurus cristatus* is positioned outside a clade containing all other nonmysid Peracarida.
