## 2. Slice Likelihood Standard Error Figures

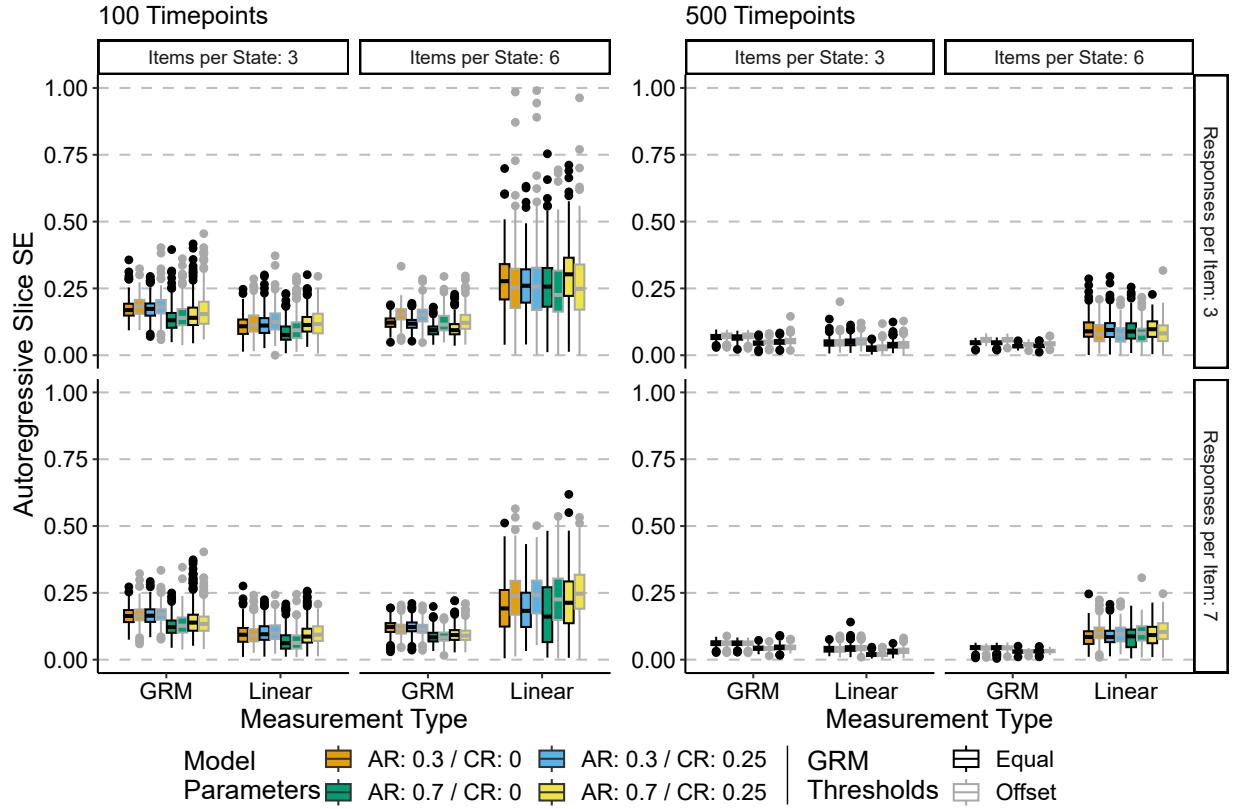

FIGURE S1.

Autoregressive Parameter Slice SE. Central black line on boxplot denotes median, box denotes 25%–75% interquartile range, whiskers denote  $1.5 \times IQR$ . AR refers to the autoregressive parameter while CR refers to the cross-regressive parameter.

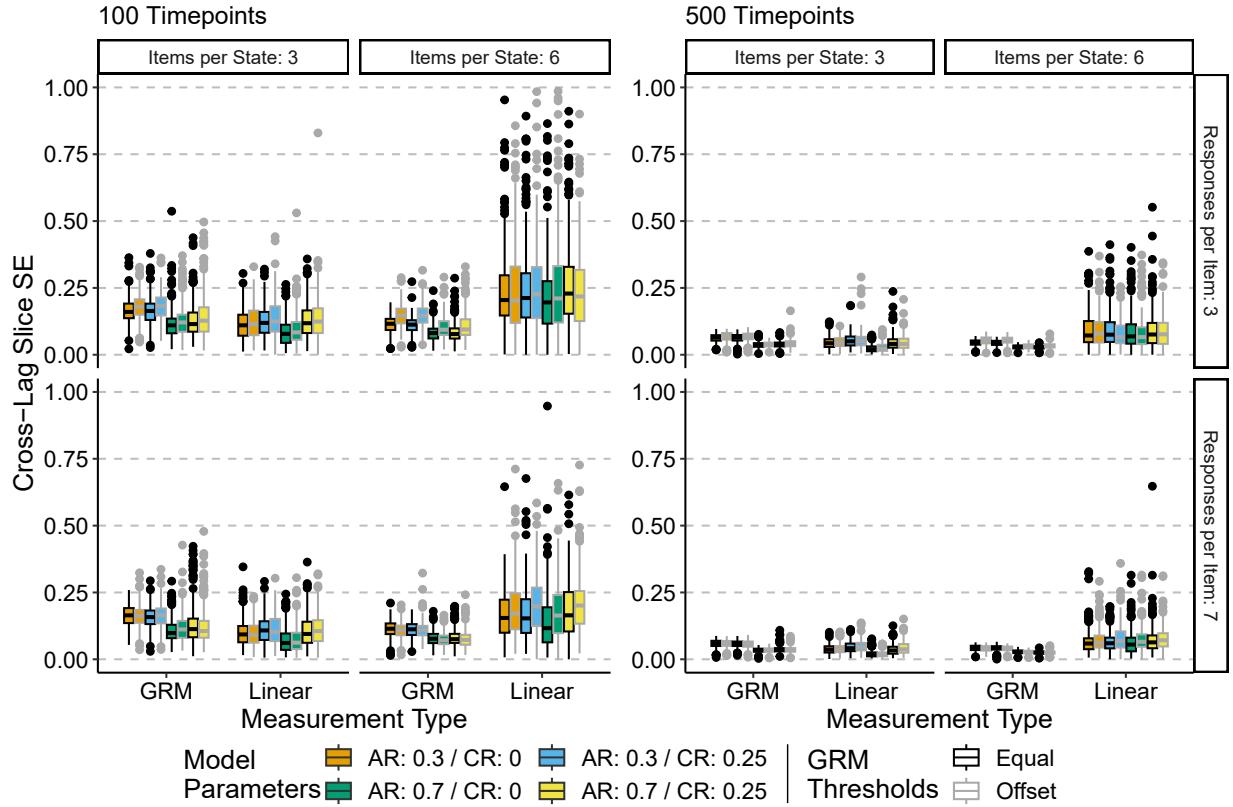

FIGURE S2.

Cross-regressive Slice SE. Central black line on boxplot denotes median, box denotes 25% – 75% interquartile range, whiskers denote  $1.5 \times IQR$ . AR refers to the autoregressive parameter while CR refers to the cross-regressive parameter.
