

Appendix A. Differences (row variable minus column variable) in coefficient estimates.

	Enjoyment Δ Coeff.	Autonomy Δ Coeff.	Sensory functioning Δ Coeff.	Social relationships Δ Coeff.	Social participation Δ Coeff.	Financial security Δ Coeff.	Secure living environment Δ Coeff.	Absence of fear of death Δ Coeff.	Psychological resilience Δ Coeff.	Self- realization Δ Coeff.
Autonomy	-.490***									
Sensory functioning	-.727***	-.237***								
Social relationships	-.336***	.154***	.391***							
Social participation	-.159***	.332***	.569***	.177***						
Financial security	-.393***	.098	.335***	-.056	-.234***					
Secure living environment	-.714***	-.224***	.013	-.378***	-.556***	-.322***				
Absence of fear of death	-.593***	-.102	.135*	-.256***	-.434***	-.200***	.122*			
Psychological resilience	-.438***	.053	.290***	-.101*	-.279***	-.045	.277***	.155**		
Self-realization	-.335***	.155***	.392***	.001	-.176***	.057	.379***	.258***	.103*	
Control	-.509***	-.018	.219***	-.172***	-.350***	-.116*	.206***	.084	-.071	-.174***

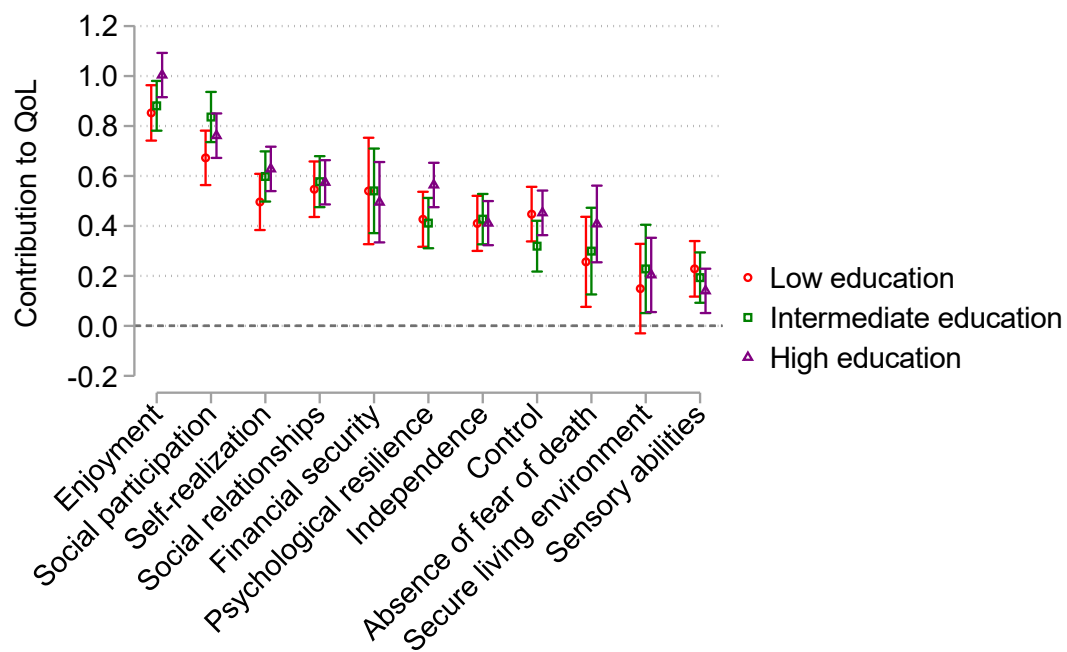

Notes: Differences in coefficient estimates were obtained using post-estimation based on the first model presented in Table 3 (full sample model);

Data are from LISS panel; Model estimated with robust standard errors; Δ Coeff.: difference in coefficient estimate;

* $p < .05$, ** $p < .01$, *** $p < .001$

Appendix B. Estimated contribution to quality of life by dimension, by respondent gender.

Appendix C. Estimated contribution to quality of life by dimension, by respondent's educational attainment.
