

Data statement for Goldberg/Sciarini - What drives direct democratic turnout? A joint analysis of individual, referendum and community factors

All analyses at the individual level rely on registered turnout data. These data stem from the Statistical Office of the Canton Geneva (OCSTAT; <https://www.ge.ch/statistique/>), which granted us access to and use of the data for scientific purposes. The respective licence agreement (signed by P. Sciarini) forbids the transmission or publication of the data. We are thus unable to upload the respective data.
