

Supplementary Figure 1. Mediation model.
Covariates were omitted for readability (see Figure 2 for the model with covariates).

Rectangles indicate the observed variables, ovals the latent variables, single-headed arrows the regressions (freely estimated regression weight), double-headed arrows the covariances. Path coefficients were standardized. Significance levels are as follows: *** P < 0.001, ** P < 0.01, * P < 0.05.

FAST: Functioning Assesment Short Test; GAF: Global Assesment of Functioning.
