

1 Appendix V: Inputs for the attitude module; the mean negative attitude (NA) levels per aspect for the default situation and the  
 2 increase or decrease in NA levels compared to the default situation and the variation (Var;  $\pm$ ) per measure for sow husbandry.

Aspect	NA <sup>a</sup>		Increase or decrease in NA per measure and their variation

3 <sup>a</sup>Negative attitude levels are on a scale of 1 (no negative attitude) to 5 (maximum negative attitude).

4 <sup>b</sup>Measure abbreviations: PM: piglet mortality, TB: tail biting, IH: indoor housing gestating sows, PM1: camera surveillance farrowing pen, PM2: jute sack provision

5 sow, PM3: straw provision sow, PM4: sow habituation, TB1: tail docking with analgesia, TB2: biting material for weaned piglets, TB3: straw playing area for weaned

6 piglets, TB4: chopped straw provision for weaned piglets, IH1: free range outside area, IH2: straw provision, IH3: straw provision and window, IH4: straw provision,

7 window and increased group size.

8 <sup>c</sup>When no value is given it was assumed to be the same value as in the default situation.
