

Instructions

Models

Pos models (EnLevel): Statistics of LMM and GLMM models for positive words, with English proficiency coded as a categorical variable
Neg models (EnLevel): Statistics of LMM and GLMM models for negative words, with English proficiency coded as a categorical variable
Pos BDI (EnLevel): Statistics of the separate model with the inclusion of BDI scores as an additional fixed effect for positive words
Pos STAI (EnLevel): Statistics of the separate model with the inclusion of STAI scores as an additional fixed effect for positive words
Neg BDI (EnLevel): Statistics of the separate model with the inclusion of BDI scores as an additional fixed effect for negative words
Neg STAI (EnLevel): Statistics of the separate model with the inclusion of STAI scores as an additional fixed effect for negative words
Pos models (EnAverage): Statistics of LMM and GLMM models for positive words, with English proficiency coded as a continuous variable
Neg models (EnAverage): Statistics of LMM and GLMM models for negative words, with English proficiency coded as a continuous variable

Abbreviations

Pos: positive words
Neg: negative words
EnLevel: English proficiency levels
EnAverage: English proficiency average scores
