

Impacts of Quality of Life

Chiadi Onwuka BPH, CNHP, CBHCM, CEO

D'Amore-McKim School of Business, Northeastern University, Boston, United States

Introduction

Nearly 1 in 4 Americans report financial barriers to accessing healthcare, leading to poorer outcomes and quality of life. This poster presents key results from a market survey by ChiKobi Health examining interrelationships between financial hardship, unmet healthcare needs, and emotional, psychical and social health. As climate change escalates systemic crisis, expanding access to preventative and personalized medicine is an urgent public health priority.

Limitations

- Convenience sampling provides indicative but non-generalizable results
- Self-reported data subject to inherent biases
- Small sample size

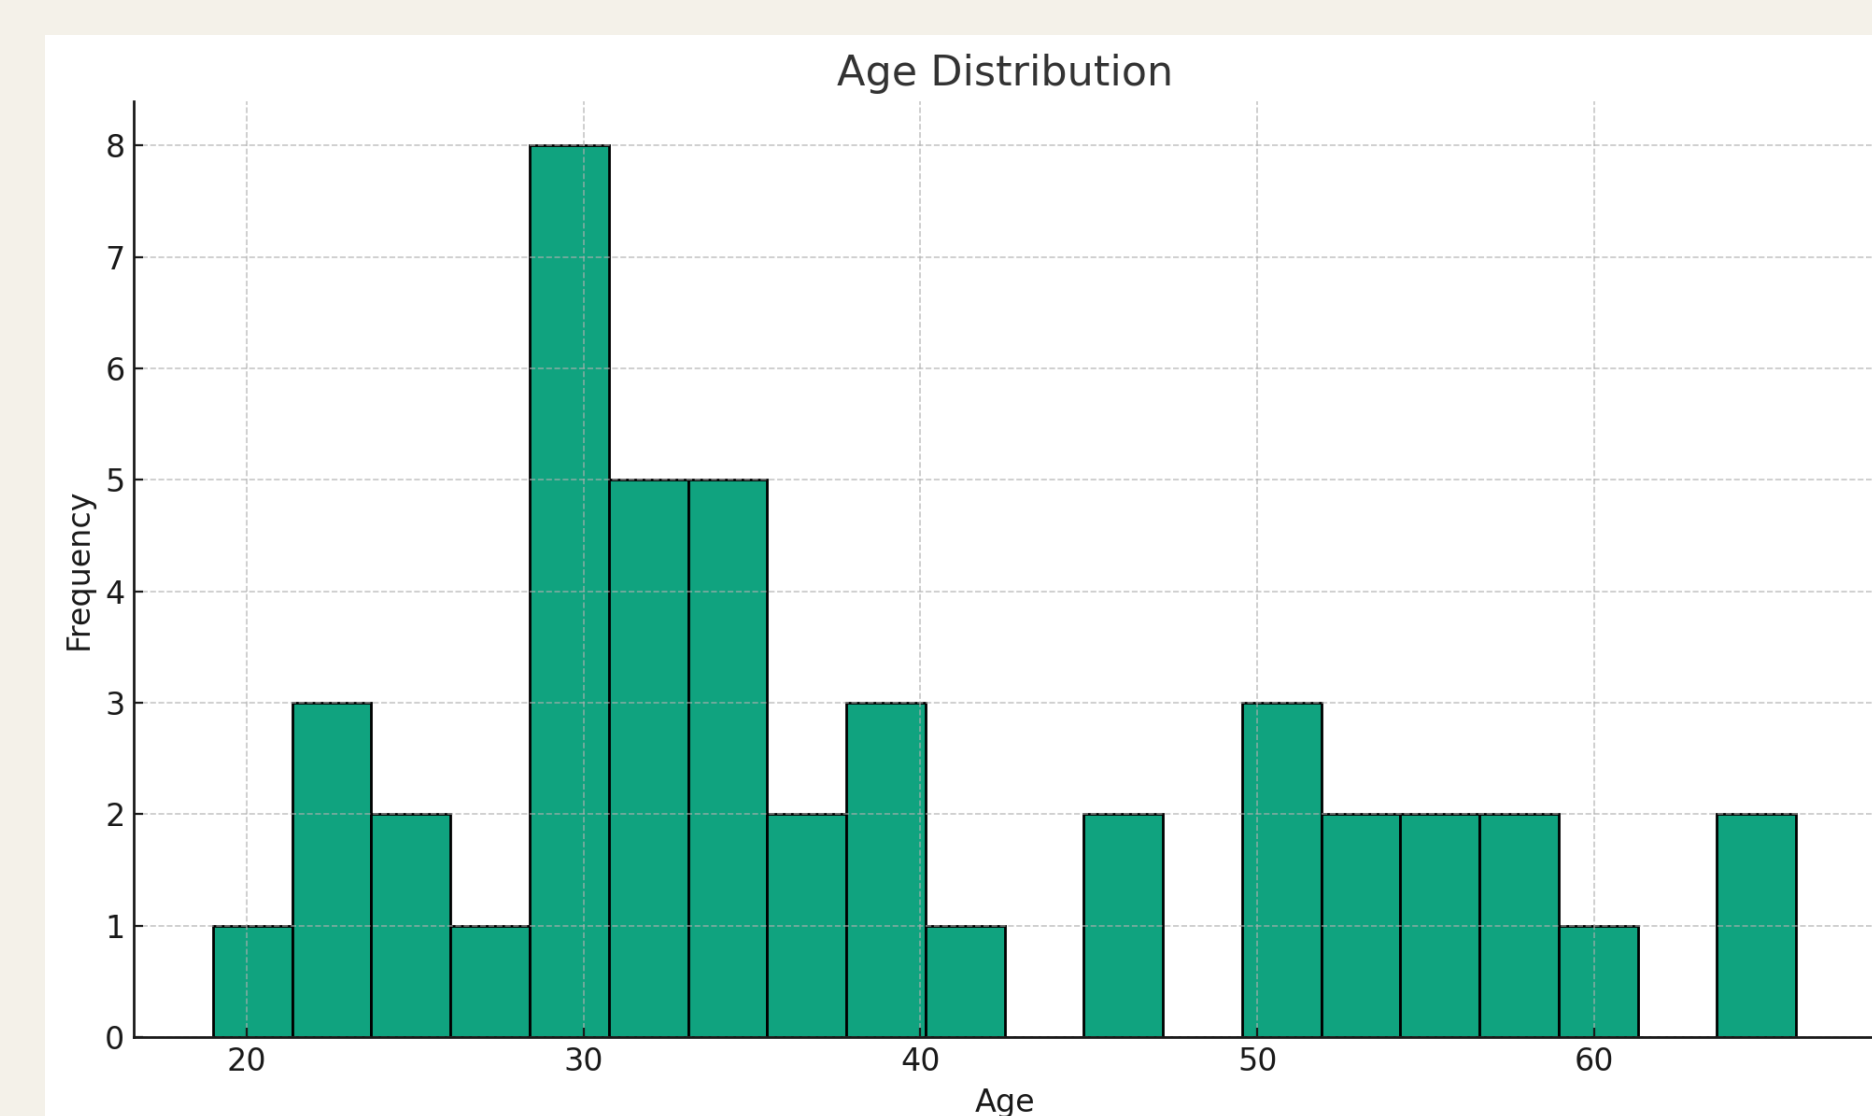

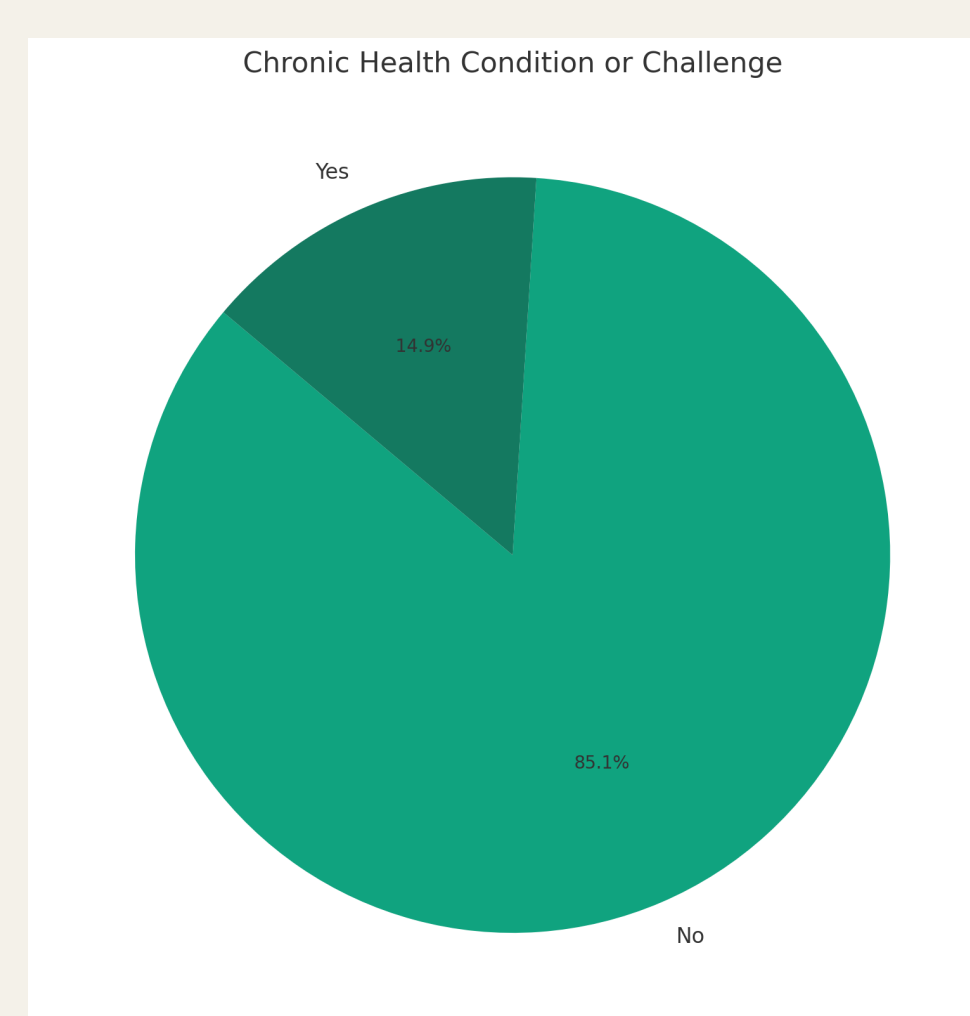

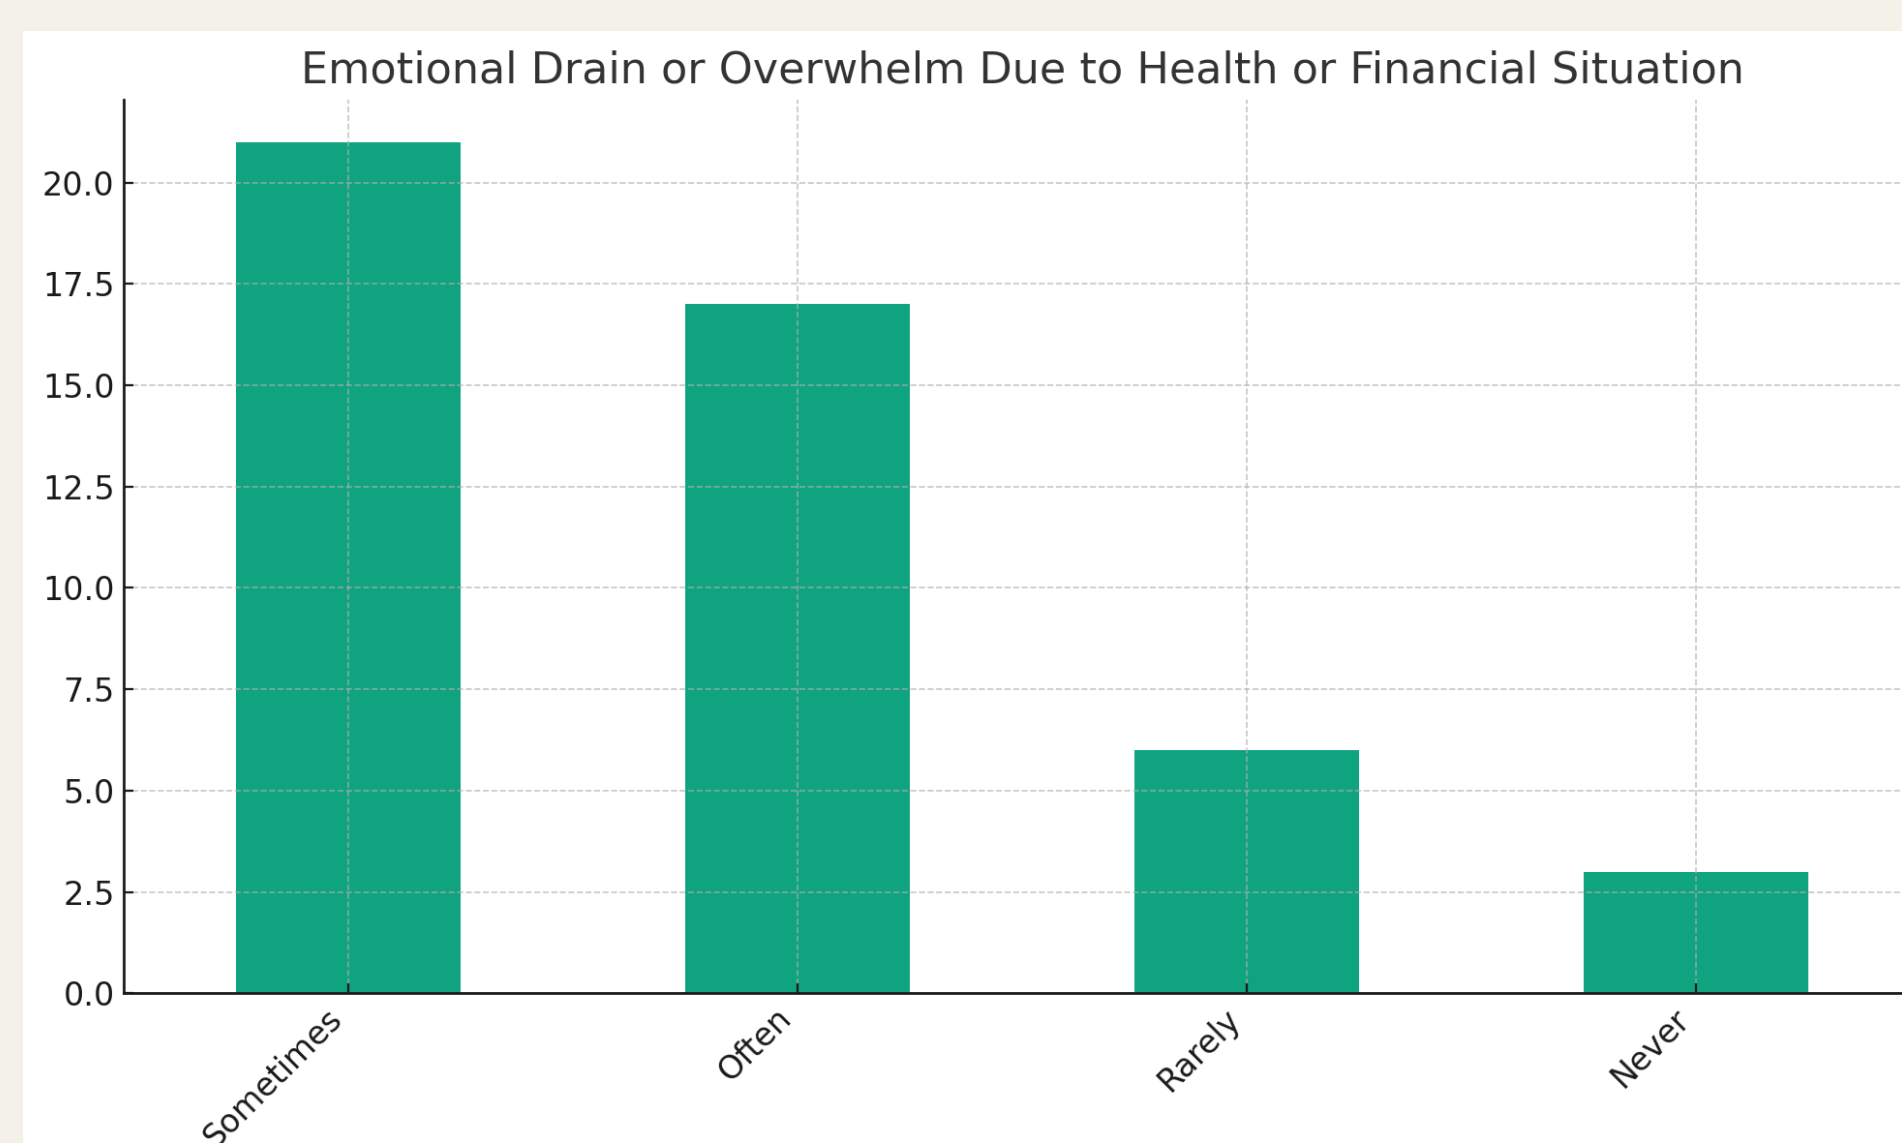

Background

Financial obstacles to getting care or treatment are associated with emotional distress, uncontrolled chronic conditions, delayed diagnoses, and general declines across wellbeing dimensions like daily functioning and social health.

Methods

- 47-respondent online survey with 20 questions of healthcare, finances and wellbeing
- Recruitment via social media and community engagement
- Data analysis in Excel using correlations, histograms and descriptive statistics

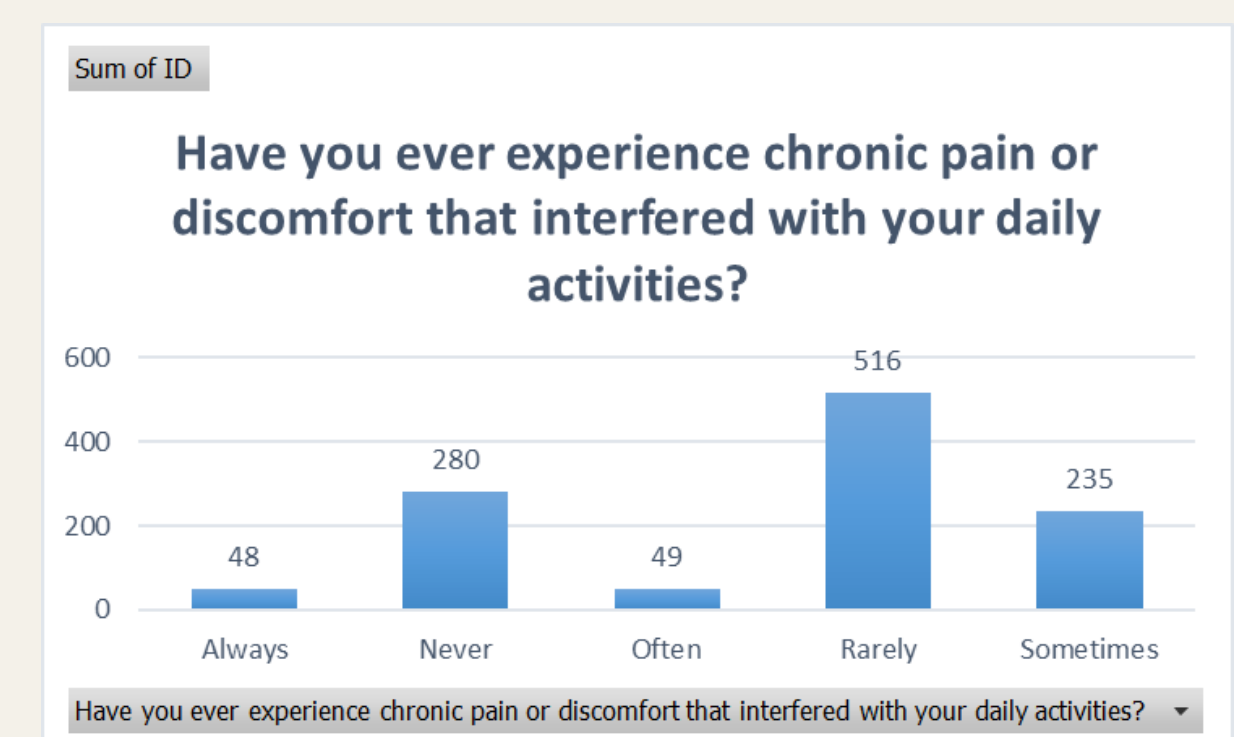

ChiKobi Health Offerings

We are on a mission to transform the healthcare experience through preventative, personalized care. Our customized programs empowers you with insights, tools, medical holistic devices, and support to optimize your health proactively.

Easy Access to Care	Care Coordination
Holistic Options	Trustworthy Care
Affordability	Easy Scheduling

Key Results

- **Emotional Distress:** A staggering 88% of participants reported experiencing emotional distress frequently, primarily attributed to healthcare and financial concerns
- **Quality of Life vs. Chronic Pain:** Despite 80% rating their quality of life positively, a notable 40% reported chronic pain significantly interfering with their daily activities.
- **Healthcare Management Interest:** Around 60% of respondents showed a keen interest in personalized healthcare management services.
- **Holistic Product Interest:** A significant 84% were inclined towards integrative wellness products, indicating a shift towards holistic health solutions.

Conclusion

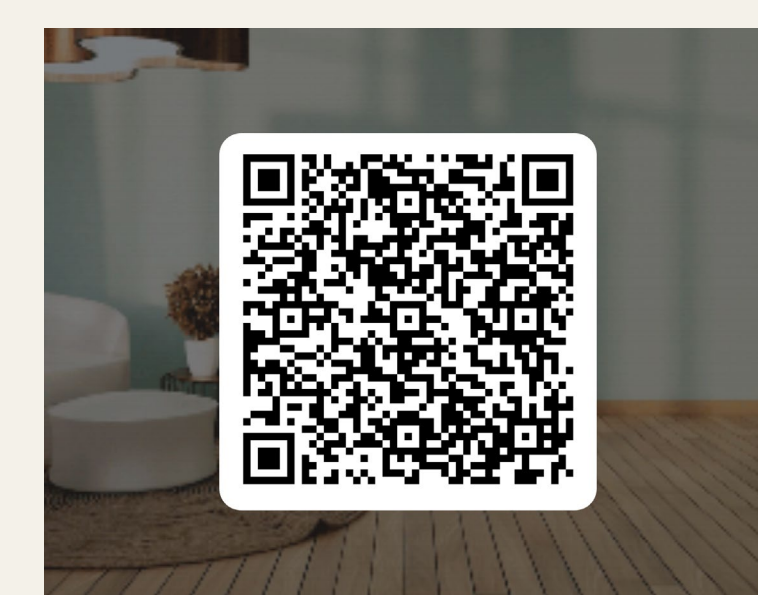

Urgent need exists for accessible, integrative care models using technology to provide whole-person centered care. The survey reveals a significant link between financial strain, healthcare challenges, and overall well-being. These insights are crucial for ChiKobi Health's mission in offering holistic healthcare solutions, especially considering the current global health dynamics.

ChiKobi Health's Mission for Integrative Care

- Accessible, integrative care models are urgently needed.
- Technology is key to providing whole-person centered care.
- There's a significant link between financial strain and healthcare challenges.
- These factors greatly affect overall well-being.
- ChiKobi Health is committed to offering holistic healthcare solutions.
- The current global health dynamics emphasize the need for such solutions.
