PHASE 1

A Priori Research Questions

PHASE 2

Qualitative Synthesis 1   +   Qualitative Synthesis 2
(Study 1)   (Study 2)

PHASE 3

Empirical Research (Study 3)
FURTHER RESEARCH QUESTIONS (SEQUENTIAL)

PHASE 4

Self-report Survey (Study 4)

Strand A

ED Severity Measures

Scoring
Validated Instruments
HADS, EDEQS, SF12, SCIM

Strand B

Quant Variables

Calculated Variables
Treatment latency, type,
number, and TESSR score

Strand C

Open-ended Q's

Thematic Analysis
Treatment experiences
sense of self

META INFERENCE

GENERALISATION OF FINDINGS
EXTERNAL GENERALISATION

[**Paradigm:** pragmatism]

[**CROSS OVER TRACKS ANALYSIS**]

[**Rationale:** Complementarity, completeness, Explanation]

[**MIXING** – LINK, COMBINE, INTEGRATE ANALYSES]

*HADS=hospital anxiety and depression score; EDEQS=eating disorder examination
questionnaire (short); SF12= health related quality of life short form 12 version 2;
SCIM= Self-concept and identity measure; TESSR=treatment experiences sliding scale rater*
