Q64 Please rate your agreement with the following statement: *DISC is actively promoting equity through their various trainings and initiatives.* When we use the term equity, we mean the condition that would be achieved if one's identity (e.g., race, age, income, gender) no longer predicted, in a statistical sense, how one fares. We are thinking about equity as one part of justice, and thus we also include work to address root causes of inequities, not just their manifestation. This includes elimination of policies, practices, attitudes, and cultural messages that reinforce differential outcomes by identity or that fail to eliminate them. - Source: [Center for Assessment and Policy Development](http://www.capd.org/)
To learn more about how the DISC intends to address equity, please read this [statement](https://medschool.ucsd.edu/research/actri/centers/DIR/Documents/DISC%20Statement%20Specific%20REV%204%20FINAL.pdf).
