

Supplemental Table 1. Number of Individuals from Inhumation and Cremation Burials at Pueblo Grande

	Platform Mound and Vicinity Excavations ^a	Hohokam Expressway Excavations. ^b	1997–2002 Soil Systems Excavations ^c	Total
<i>Inhumations</i>				
Preclassic	9			9
Early Classic	6	269	223	498
Late Classic	31	171	71	273
Classic Undated	16	194		210
Undated	18		274	292
Total	80	634	568	1,282
<i>Cremations</i>				
Preclassic	80	0	0	80
Early Classic	18	90	105	213
Late Classic	8	23	64	95
Classic Undated	7	77		84
Undated	44	0	180	224
Total	157	190	349	696

^a These totals are derived from Pueblo Grande Museum Archives as summarized by Brunson-Hadley (1994a, 1994b) and mostly include burials from the platform mound precinct and the area to the west of the mound. A few of these burials were excavated by Omar Turney, Odd Halseth, James Simmons, and Preston Hill from 1929–1935. A majority of the burials were excavated by Julian Hayden in the years 1936–1939 as part of a Civilian Conservation Corps project. Later smaller scale excavations took place in the 1960s through 1980s. Age assessments are not available for most of this group of human remains, thus demographic analysis is not possible.

^b Totals from Mitchell (1994).

^c Totals kindly provided by Rebecca Hill. A majority of the undated burials are likely from the Late Sedentary or Classic period (personal communication 2014).
