

Appendix 1. List of macroinvertebrate taxa recorded from the three habitats in Lake Taihu. For each taxon, the mean abundance (Abun. ind.m⁻²) and biomass (Bio. g.m⁻²) in the three habitats were calculated. *When calculating abundance and biomass, large unionids (*Anodonta woodiana woodiana* and *Lamprotula leai*) and the highly mobile invertebrate (*Palaemon modestus*) were excluded. +: Present.
