List of supplementary material

OSM1. Database of reliably dated sites with human remains from northern European mires. A main division is made between single use sites with single individuals (site category A1), single use sites with multiple individuals (site category A2) and recurrently used sites (site categories B1 and B2). Dates marked in grey are not used in the analyses. Site no. 267 was added after the analyses for this paper had been finished. Age categories adopted from Frei *et al.* 2019.

OSM 2. References cited in the database.

OSM 3. Figure S1.

OSM 4. Figure S2.
