

Data supplement

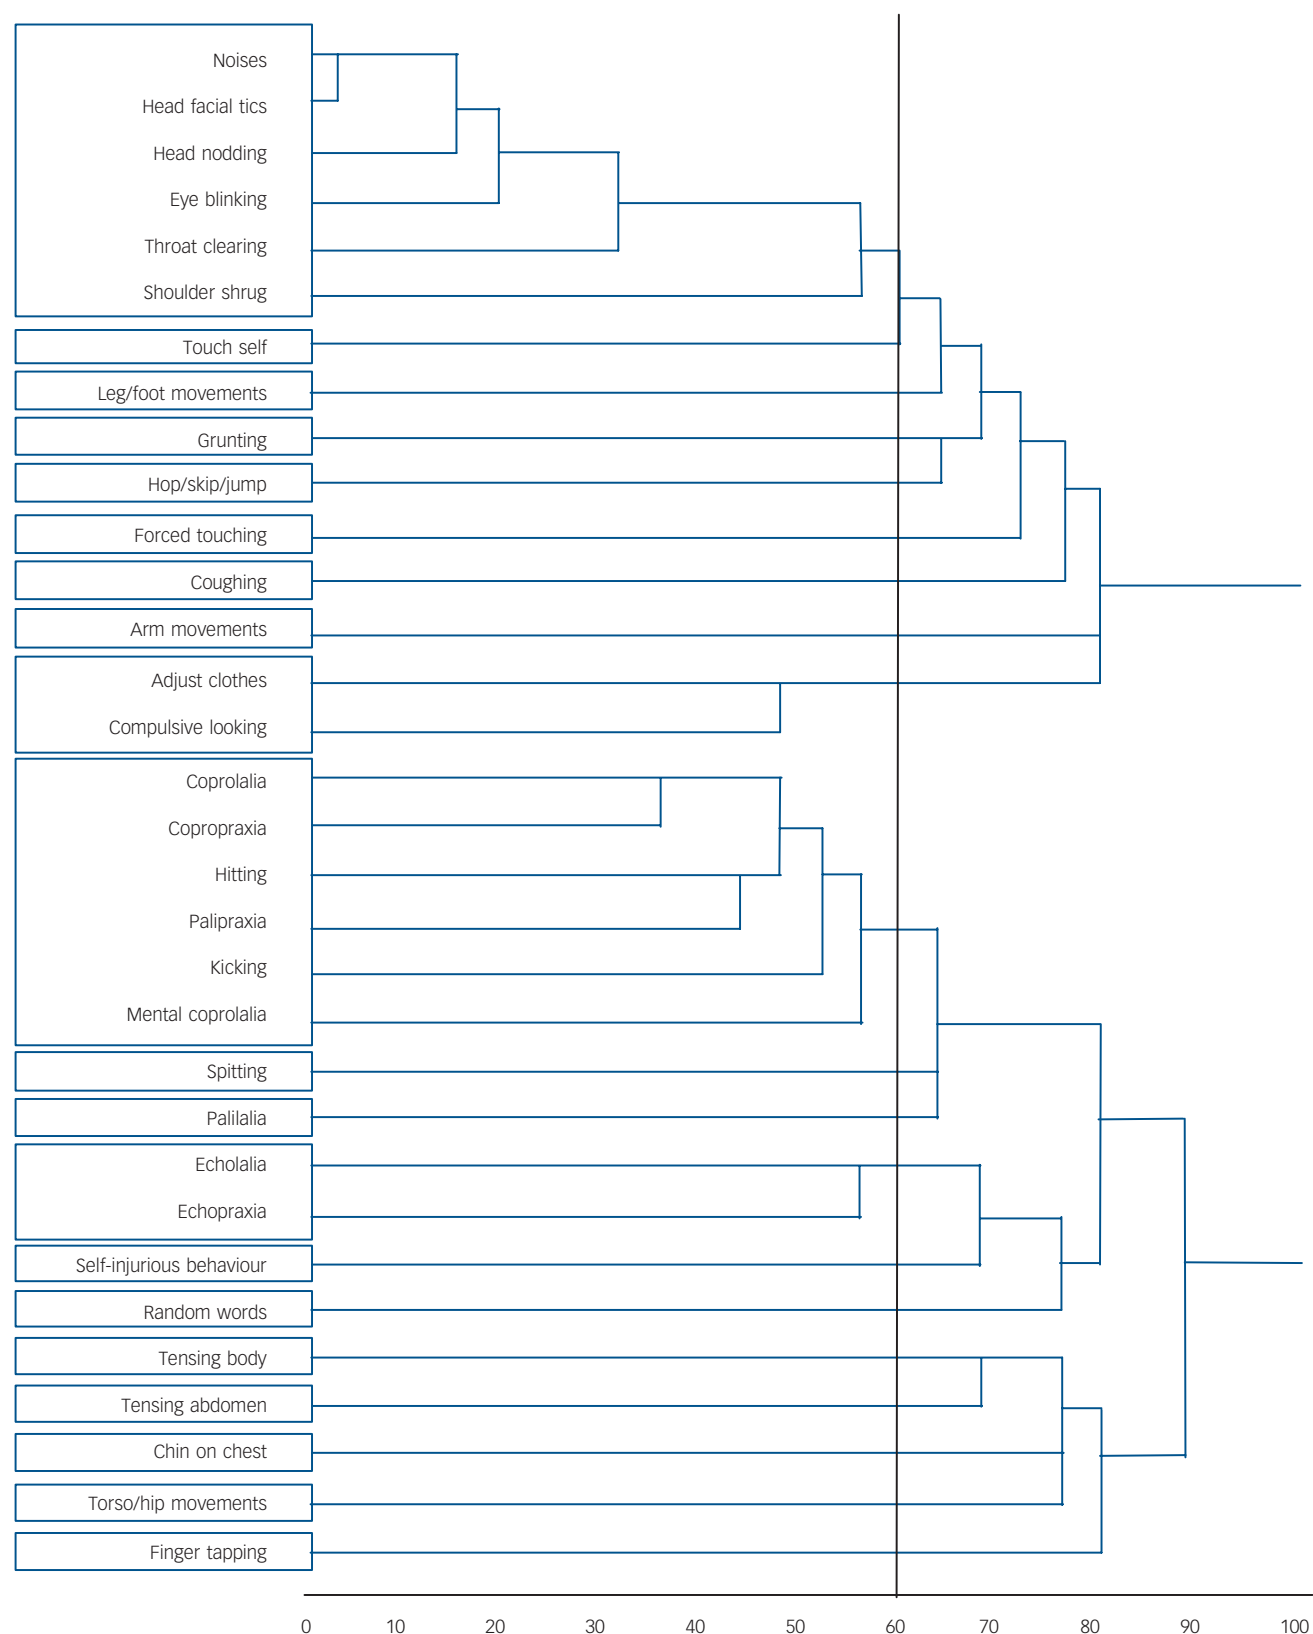

Fig. DS1 Dendrogram showing clusters of tics in 410 patients with Tourette syndrome.

Table DS1 Symptom loadings for factors with eigenvalue > 1 with a promax rotation			
Factor	Variance (from unrotated loadings), %	Constituent symptoms	Factor coefficient
1	22.9	Coprolalia, mental coprolalia, copropraxia palipraxia, hitting, kicking	0.747
		Echolalia, echopraxia	0.612
		Palilalia	0.665
		Spitting	0.594
		Random words	0.449
		Forced touching	0.419
		Self-injurious behaviour	0.376
2	7.4	Arm movements	0.782
		Hopping, skipping and jumping	0.541
		Leg and foot movements	0.438
		Torso and hip movements	0.393
3	5.8	Coughing	0.773
		Tensing body	0.565
		Grunting	0.470
		Eye, head, shoulder, noises and throat clearing	0.439
4	5.4	Compulsive finger movements	0.695
		Self-injurious behaviour	0.593
		Tensing abdomen	0.434
		Leg and foot movements	0.391
		Compulsive looking and clothing adjustment	0.378
5	5.1	Touching self	0.730
		Eye, head, shoulder, noises and throat clearing	0.382
