

Online Supplement DS1

Additional results

Hardy–Weinberg equilibrium testing (HWE) *P*-values for the other 10 SNPs, with the except of SNP rs10774037, were all larger than 0.05 in the healthy controls and all patients group (Tables DS2 and DS3). So rs10774037 was excluded from further analysis because it was not in Hardy–Weinberg equilibrium in controls (Tables DS2 and DS3).

Table DS6 present the results of linkage disequilibrium (LD) of the 10 SNPs. The pairwise LD between 10 investigated SNPs was different in the different sample sets. SNPs with $D' > 0.95$ in two disorder sample sets were classified in the same block. No specific haplotype block was identified, as shown in Fig. DS2.

Tables DS4 and DS5 present the results for the 10 SNPs. For schizophrenia, we found that rs2239015, rs2283290, rs1006737 and rs2239037 were positively associated with schizophrenia (rs2239015: $P_{\text{allele}}=0.0003$, $P_{\text{genotype}}=0.0015$, OR=1.249 [95% CI 1.100–1.400]; rs2283290: $P_{\text{allele}}=0.039$, OR=1.181 [95%CI=1.008–1.384]; rs1006737: $P_{\text{allele}}=0.0014$, $P_{\text{genotype}}=0.006$, OR=1.384[95%CI=1.134–1.690]; rs2239037: $P_{\text{allele}}=0.008$, $P_{\text{genotype}}=0.016$, OR=0.859 [95%CI=0.768–0.961]) (Table DS4). After Bonferroni multiple tests correction, rs2239015 and rs1006737 was still significant (rs2239015: $P_{\text{allele}}=0.006$, $P_{\text{genotype}}=0.030$; rs1006737: $P_{\text{allele}}=0.028$) (Table DS4).

Table DS1 The information of all 11 SNPs genotyped in the CACNA1C gene.

Fig. DS1 The triangle charts of population-stratification analysis when K=3.

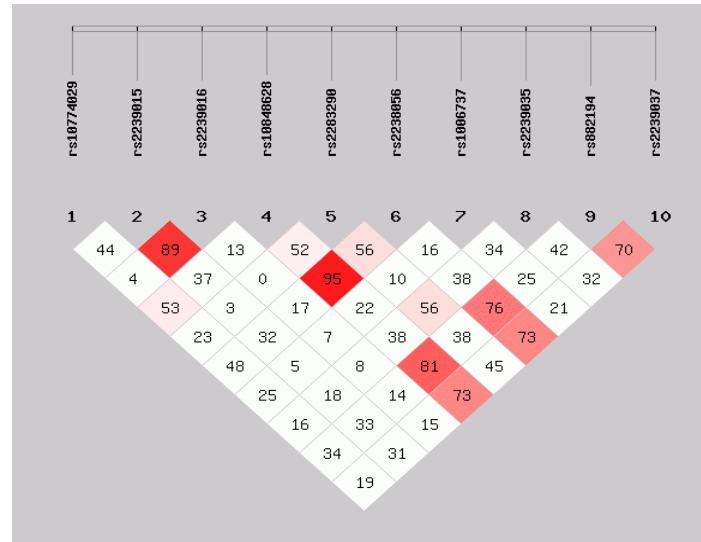

a, stratification result of combined population, in which the red, green and blue dots represent HapMap CEU, CHB and YRI population, respectively.

b, our samples from the two disorders and controls, in which the blue dots represent SCZ, the green dots represent MDD and the red dots represent healthy control populations.

a schizophrenia

b major depressive disorder

Fig. DS2 LD plots of schizophrenia and major depressive disorder.

a, b are the LD plots from SHEsis platform of schizophrenia and major depressive disorder, respectively.
