

Table S4. Group Differences in Indirect Effects for Participants who Completed the Study prior to the Covid-19 Pandemic

	Estimate	SE	<i>z</i>	<i>p</i>
Controls vs CHR	0.06	0.03	2.03	0.04*
Controls vs Depression	0.05	0.03	1.73	0.08
CHR vs Depression	-0.02	0.03	0.68	0.50

Note. After including only individuals who completed the study prior to the Covid-19 pandemic (n = 359), there was a significant difference in indirect effect between CC (n = 29) and CHR (n = 35). There was not a significant difference in indirect effects between CC and Depression (n = 196), or between CHR and Depression.

p < .05*
