

Supplementary material, Table S1. Number of individuals identified, frequency, and densities of larval species collected in eight different water bodies in Villahermosa, Tabasco, Mexico

Species	N	Frequency	Density
<i>Cx. interrogator</i>	448	39.1	32.8
<i>Cx. nigripalpus</i>	243	29.7	17.8
<i>Cx. erraticus</i>	226	42	16.5
<i>Cx. quinquefasciatus</i>	155	19.6	11.3
<i>An. albimanus</i>	114	28.3	8.35
<i>Ma. indubitans</i>	49	8	3.59
<i>Ur. lowii</i>	34	13.8	2.49
<i>Cx. lactator</i>	24	7.2	1.76
<i>Cx. coronator</i>	22	4.3	1.61
<i>Cx. corniger</i>	13	4.3	0.95
<i>Ma. titillans</i>	12	3.6	0.88
<i>Ad. squamipennis</i>	11	4.3	0.81
<i>Ae. taeniorhynchus</i>	11	1.4	0.81
<i>Ur. sapphirina</i>	3	1.4	0.15
<i>Ps. confinnis</i>	1	0.7	0.07
