Neoproterozoic ages of the Kuluketage diabase dyke swarm in Tarim of northwest China and its relationship to the breakup of Rodinia

Zhiyong Zhang, Wenbin Zhu, Liangshu Shu, Jinbao Su & Bihai Zheng

Appendix 1. Colour version of text Figure 3. The Kuluketage diabase dyke swarm. The black mafic dykes interlace with the white granitic rocks, forming the very special 'zebra pattern' geomorphological landscape (Photograph by Liangshu Shu).
