

Denaturation of selected bioactive whey proteins during pasteurization and their ability to modulate milk immunogenicity

Dimuthu Bogahawaththa and Todor Vasiljevic

SUPPLEMENTARY FILE

Supplementary Figure S1. SDS-PAGE (reducing) gel images of supernatants of the skim milk 1 samples heated at 72, 75 or 78 °C for 0-300 s. The protein bands are LF (lactoferrin), BSA 2 (bovine serum albumin) and IgG heavy chain (immunoglobulin-G heavy chain).
