

Appendix B: Coefficients for the model profile

The coefficients G_0, G_2, G_4, H_2, H_4 defined in §5 are given explicitly in this Appendix for the model skin-friction profile of §4.1. The notation is as in the main body of the paper with the additional definition

$$c = \alpha_N^{-1/3}.$$

$$\begin{aligned}
G_0 &= c\mathcal{G}_0 + (c\hat{e}\mathcal{G}_0)/2 + c\hat{e}\mathcal{G}_1 s_N + (5B^2 c\mathcal{G}_0)/72 \\
