Conservation status and management insights from tracking a cryptic and Critically Endangered species of Orchidaceae

T. KRAAIJ, J. A. BAARD and B. J. CRAIN

FIG. S1 Timeline (2009–2014) of occurrence of all flowering individuals of *Disa procera*, where 1 represents undamaged individuals that have flowered but not developed seed capsules; 2 represents individuals that have flowered and developed seed capsules; and 0 represents flowering individuals that have been damaged and prevented from setting seed. (The timeline is shown as four columns to accommodate all individuals on one page).
