

Biases in the production of knowledge on ecosystem services and poverty alleviation

ESTEVE CORBERA, SARA MAESTRE-ANDRÉS, LAURA CALVET-MIR, DAN BROCKINGTON, CAROLINE HOWE and WILLIAM M. ADAMS

SUPPLEMENTARY MATERIAL 1 Excel file containing the primary search articles and the analysis of the articles' temporal distribution, and of the institutions, organizations, countries, regions and overall citations of each author. The file also includes an analysis of the key attributes of the 401 most relevant authors in the production of knowledge (i.e. gender, PhD discipline, PhD region and employment country), the institutions or organizations where they have worked, their co-authorship patterns, and two network measures for authors and their institutions and organizations (degree and betweenness). These data are available in the Supplementary material at doi.org/10.1017/S0030605320000940

SUPPLEMENTARY FIG. 1 Relationship between authors' number of citations and citation rank. In orange, authors with only one paper published.
