

Table S4. Summary information for the ten households (HH) surveyed in each of 16 villages (n=160 households) adjacent to the southeastern boundary of RNP, in central Tanzania, including the area, village size category, the number of inhabitants, the number of households per village with bomas categorized as adequate or poor quality, the distance category of villages and the distance (km) of villages from the RNP boundary.

Village	Area	Size category	Number of inhabitants	Quality category of the main boma in 10 HH per village	Distance from RNP	
					category	km
1	1	large	4,363	9 adequate, 1 poor	far	13.2
2	1	medium	1,565	5 adequate, 5 poor	near	3.3
3	1	medium	1,200	9 adequate, 1 poor	near	7.8
4	1	medium	2,250	7 adequate, 3 poor	far	19.5
5	1	medium	2,913	8 adequate, 2 poor	far	21.0
6	1	medium	1,565	9 adequate, 1 poor	far	20.0
7	1	large	4,763	6 adequate, 4 poor	far	26.9
8	1	small	334	7 adequate, 3 poor	far	23.0
9	2	medium	1,313	7 adequate, 3 poor	far	14.2
10	2	small	703	5 adequate, 5 poor	near	0.5
11	2	medium	1,444	4 adequate, 6 poor	near	5.0
12	2	medium	1,011	5 adequate, 5 poor	near	19.0
13	2	large	3,112	9 adequate, 1 poor	near	0.5
14	2	small	299	8 adequate, 2 poor	near	0.9
15	2	medium	1,120	5 adequate, 5 poor	near	1.3
16	2	medium	1,901	3 adequate, 7 poor	near	1.9
