1 **TITLE I—NATIONAL SCIENCE**
2 **FOUNDATION**

3 **SEC. 101. FINDINGS.**

4 Congress finds the following:

5 (1) The Foundation has made major contribu-
6 tions for more than 50 years to strengthen and sus-
7 tain the Nation’s academic research enterprise.

8 (2) The economic strength and national security
9 of the United States, and the quality of life of all
10 Americans, are grounded in the Nation’s scientific
11 and technological capabilities.

12 (3) The Foundation carries out important func-
13 tions in supporting basic research in all science and
14 engineering disciplines and in supporting science,
15 mathematics, engineering, and technology education
16 at all levels.

1 (4) The research and education activities of the
2 Foundation promote the discovery, integration, dis-
3 semination, and application of new knowledge in
4 service to society and prepare future generations of
5 scientists, mathematicians, and engineers who will
6 be necessary to ensure America's leadership in the
7 global marketplace.

8 (5) The Foundation is charged with the respon-
9 sibilities—

10 (A) to develop and encourage the pursuit
11 of a national policy for the promotion of basic
12 research and education in the sciences;

13 (B) to initiate, support, and conduct basic
14 scientific research and to appraise the impact of
15 research upon industrial development and the
16 general welfare;

17 (C) to initiate, support, and conduct sci-
18 entific research activities in connection with
19 matters relating to the national defense, at the
20 request of the Secretary of Defense;

21 (D) to award scholarships and graduate
22 fellowships in the sciences;

23 (E) to foster the interchange of scientific
24 information among scientists;

1 (F) to evaluate scientific research pro-
2 grams undertaken by agencies of the Federal
3 Government, and to correlate the Foundation's
4 scientific research with those undertaken by in-
5 dividuals and by public and private research
6 groups;

7 (G) to establish such special commissions
8 as the Board may deem necessary; and

9 (H) to maintain a register of scientific and
10 technical personnel in the United States.

11 (6) The emerging global economic, scientific,
12 and technical environment challenges long-standing
13 assumptions about domestic and international policy,
14 requiring the Foundation to play a more proactive
15 role in sustaining the competitive advantage of the
16 United States through superior research capabilities.

17 (7) Commercial application of the results of
18 Federal investment in basic and computing science
19 is consistent with longstanding United States tech-
20 nology transfer policy for cybersecurity and other
21 homeland security applications, because of the ur-
22 gent needs of commercial, academic, and individual
23 users as well as the Federal and State Governments.

1 **SEC. 102. POLICY OBJECTIVES.**

2 In allocating resources made available under this sub-
3 title, the Foundation shall have the following policy objec-
4 tives:

5 (1) To strengthen the Nation's lead in science
6 and technology by—

7 (A) increasing the national investment in
8 general scientific research and increasing in-
9 vestment in strategic areas vital to the national
10 interest;

11 (B) balancing the Nation's research port-
12 folio among the life sciences, mathematics, the
13 physical sciences, computer and information
14 science, geosciences, engineering, and social, be-
15 havioral, and economic sciences, all of which are
16 important for the continued development of en-
17 abling technologies necessary for sustained
18 international competitiveness;

19 (C) expanding the pool of scientists and
20 engineers in the United States;

21 (D) modernizing the Nation's research in-
22 frastructure; and

23 (E) establishing and maintaining coopera-
24 tive international relationships with premier re-
25 search institutions.

26 (2) To increase overall workforce skills by—

1 (A) improving the quality of and access to
2 mathematics and science education, particularly
3 in kindergarten through grade 12; and

4 (B) expanding STEM training opportuni-
5 ties at institutions of higher education.

6 (3) To strengthen innovation by expanding the
7 focus of competitiveness and innovation policy at the
8 regional and local level.

9 **SEC. 103. DEFINITIONS.**

12 **SEC. 104. GREATER ACCOUNTABILITY IN FEDERAL FUND-**
13 **ING FOR RESEARCH.**

14 (a) STANDARD FOR AWARD OF GRANTS.—The Foun-
15 dation may award Federal funding for basic research and
16 education in the sciences through a new research grant
17 or cooperative agreement only if an affirmative determina-
18 tion is made under subsection (b) and a written justifica-
19 tion relating thereto is published under subsection (c).

20 (b) DETERMINATION.—A determination referred to
21 in subsection (a) is a determination by the Director as
22 to why the research grant or cooperative agreement—

23 (1) is in the national interest;

24 (2) is worthy of Federal funding; and

25 (3) achieves one or more of the following goals:

1 (A) Increased economic competitiveness of
2 the United States.

3 (B) Advancement of the health and welfare
4 of the American public.

5 (C) Development of a STEM workforce
6 and increased public scientific literacy in the
7 United States.

8 (D) Increased partnerships between aca-
9 demia and industry in the United States.

11 the United States.

12 (F) Support for the national defense.

13 (c) WRITTEN JUSTIFICATION.—Prior to any award
14 of Federal funding described in subsection (a), the Foun-
15 dation shall publish on its public website a written jus-
16 tification relating to the determination under subsection
17 (b), along with the name of the employee or employees
18 who made the determination and any other information
19 about the research proposal the Director considers appro-
20 priate.

21 (d) IMPLEMENTATION.—A determination under sub-
22 section (b) shall be made after a research grant or cooper-
23 ative agreement proposal has satisfied the Foundation's
24 reviews for Merit and Broader Impacts.

1 (e) **EMPLOYEE TRAINING.**—The Director shall en-
2 sure that employees of the Foundation are aware of the
3 restriction in subsection (a), and that the employees are
4 trained in how to make a determination and provide writ-
5 ten justification as required under this section.

6 (f) **ANNUAL AUDITS.**—The Director shall ensure that
7 the standard in subsection (a) is properly applied by an
8 annual audit of the research grants and cooperative agree-
9 ments awarded by the Foundation for the previous fiscal
10 year. The Director shall annually report the results of this
11 audit to the Committee on Science, Space, and Technology
12 of the House of Representatives and the Committee on
13 Commerce, Science, and Transportation of the Senate by
14 February of the following fiscal year.

15 **SEC. 105. SOCIAL AND BEHAVIORAL SCIENCES.**

16 A directorate of the Foundation other than the Direc-
17 torate for Social, Behavioral, and Economic Sciences may
18 fund social and behavioral science research focused on its
19 mission areas if such research is determined to be a higher
20 priority than other research in that directorate's mission
21 portfolio.

22 **SEC. 106. OBLIGATION OF MAJOR RESEARCH EQUIPMENT**
23 **AND FACILITIES CONSTRUCTION FUNDS.**

24 No funds may be obligated for Major Research
25 Equipment and Facilities Construction for the Foundation

1 until 30 days after the report required with respect to each
2 such fiscal year under section 14(a)(2) of the National
3 Science Foundation Authorization Act of 2002 (42 U.S.C.
4 1862n-4(a)(2)) is transmitted to the Congress.

5 **SEC. 107. GRADUATE STUDENT SUPPORT.**

6 Section 510(b) of the America COMPETES Reau-
7 thorization Act of 2010 (42 U.S.C. 1869 note) is amended
8 to read as follows:

9 “(b) EQUAL TREATMENT OF IGERT AND GRF.—

10 “(1) RATE OF FUNDING INCREASES.—For any
11 fiscal year, the Director may only increase funding
12 for the Foundation’s Graduate Research Fellowship
13 program (or any successor thereto) over the previous
14 fiscal year’s funding level at the same rate as a cor-
15 responding funding increase for the Foundation’s
16 Integrative Graduate Education and Research
17 Traineeship program (or any successor thereto).

18 “(2) ESSENTIAL ELEMENTS OF IGERT.—The
19 essential elements of the Foundation’s Integrative
20 Graduate Education and Research Traineeship pro-
21 gram (or any successor thereto) shall be maintained,
22 including—

23 “(A) collaborative research that transcends
24 traditional disciplinary boundaries to solve large

1 and complex research problems of significant
2 scientific and societal importance; and

3 “(B) providing students the opportunity to
4 become leaders in the science and engineering
5 of the future.”.

6 **SEC. 108. PROHIBITION.**

7 The Foundation may not implement any STEM edu-
8 cation program and activity changes proposed for the
9 Foundation in the budget for fiscal year 2014 transmitted
10 to Congress under section 1105(a) of title 31, United
11 States Code.

12 **SEC. 109. REVIEW OF EDUCATION PROGRAMS.**

13 (a) IN GENERAL.—The Director shall review the edu-
14 cation programs of the Foundation that are in operation
15 as of the date of enactment of this Act to determine—

16 (1) whether any of such programs duplicate tar-
17 get groups, services provided, fields of focus, or ob-
18 jectives; and

19 (2) how those programs are being evaluated
20 and assessed for outcome-oriented effectiveness.

21 (b) REPORT.—Not later than 1 year after the date
22 of enactment of this Act, and annually thereafter as part
23 of the annual budget submission to Congress, the Director
24 shall complete a report on the review carried out under
25 this section and shall submit the report to the Committee

1 on Science, Space, and Technology and the Committee on
2 Appropriations of the House of Representatives, and to
3 the Committee on Commerce, Science, and Transpor-
4 tation, the Committee on Health, Education, Labor, and
5 Pensions, and the Committee on Appropriations of the
6 Senate.

7 **SEC. 110. RECOMPETITION OF AWARDS.**

8 (a) FINDINGS.—The Congress finds that—

9 (1) the merit-reviewed competition of grant and
10 award proposals is a hallmark of the Foundation
11 grant and award making process;

12 (2) the majority of Foundation-funded
13 multiuser facilities have transitioned to five-year co-
14 operative agreements, and every five years the pro-
15 gram officer responsible for the facility makes a rec-
16 ommendation to the National Science Board as to
17 the renewal, recompetition, or termination of sup-
18 port for the facility; and

19 (3) requiring expiring awards to be recompeted
20 follows from the conviction that competition is the
21 process most likely to ensure the effective steward-
22 ship of Foundation funds for supporting research
23 and education.

24 (b) RECOMPETITION.—The Director shall ensure that
25 the system for recompetition of Maintenance and Oper-

1 ations of facilities, equipment and instrumentation is fair,
2 consistent, and transparent and is applied in a manner
3 that renews grants and awards in a timely manner. The
4 Director shall periodically evaluate whether the criteria of
5 the system are being applied in a manner that is trans-
6 parent, reliable, and valid.

7 **SEC. 111. SENSE OF THE CONGRESS REGARDING INDUSTRY**
8 **INVESTMENT IN STEM EDUCATION.**

9 It is the sense of Congress that—

10 (1) in order to bolster the STEM workforce
11 pipeline, many industry sectors are becoming in-
12 volved in K-12 initiatives and supporting under-
13 graduate and graduate work in STEM subject areas
14 and fields;

15 (2) partnerships with education providers,
16 STEM focused competitions, and other opportunities
17 have become important pieces of private sector ef-
18 forts to strengthen the STEM workforce;

19 (3) understanding the work private sector orga-
20 nizations are undertaking in the STEM fields will
21 inform the Federal Government's role in STEM edu-
22 cation; and

23 (4) industry initiatives that support STEM edu-
24 cation should be encouraged and supported by the
25 Foundation.

1 **SEC. 112. MISREPRESENTATION OF RESEARCH RESULTS.**

2 (a) CERTIFICATION.—As a condition of receiving a
3 research grant from the Foundation, a principal investi-
4 gator shall sign a statement certifying that the findings
5 and conclusions of any article authored by such principal
6 investigator, using the results of the research conducted
7 under the grant, that is published in a peer-reviewed publi-
8 cation will be based on an accurate and truthful represen-
9 tation of the research results.

10 (b) INVESTIGATION.—The Inspector General of the
11 Foundation shall investigate suspected violations of a cer-
12 tification signed under subsection (a), and shall submit to
13 the Director the results of such investigation, along with
14 a recommendation with respect to whether a violation has
15 occurred.

16 (c) DETERMINATION.—

17 (1) IN GENERAL.—Based on the results of the
18 investigation conducted under subsection (b), the Di-
19 rector shall make a determination of whether the
20 principal investigator knowingly misrepresented the
21 results of research conducted with funding from the
22 Foundation.

23 (2) PUBLICATION.—The Director shall make
24 publicly available any determination made under
25 paragraph (1), which shall include the name of the
26 principal investigator.

1 (d) 10-YEAR BAN.—The Foundation may not, for a
2 period of 10 years, provide a research grant or grant ex-
3 tension to a principal investigator who has knowingly mis-
4 represented the results of research through—

- 5 (1) publication in a peer-reviewed publication;
- 6 (2) submission of data to the repository estab-
7 lished under section 306(a)(1); or
- 8 (3) an application for a research grant or grant
9 extension from the Foundation.

10 (e) APPEAL.—The Director shall establish a process
11 by which a principal investigator may appeal a determina-
12 tion made under subsection (c) and a ban under sub-
13 section (e). If the Director determines that the determina-
14 tion made under subsection (c) was not correct, the Direc-
15 tor shall make that correction publicly available. The Di-
16 rector may shorten the period of a ban under subsection
17 (d) based on information provided in the appeal process
18 under this subsection.

19 **SEC. 113. CITATIONS SUPPORTING RESEARCH GRANT AP-**
20 **PLICATIONS.**

21 A peer-reviewed research grant proposal application
22 to the Foundation may not include, with respect to a prin-
23 cipal investigator, more than 5 citations to articles pub-
24 lished by the principal investigator in a peer-reviewed pub-
25 lication. The Foundation may not consider more than 5

1 citations to such articles in determining whether to award
2 such a research grant.

3 **SEC. 114. RESEARCH GRANT CONDITIONS.**

4 The Foundation shall establish procedures to ensure
5 that—

6 (1) a research grant awarded by the Founda-
7 tion to a principal investigator does not duplicate the
8 scientific aims and scope of any grant awarded to
9 the same investigator by another Federal agency;

10 (2) a principal investigator includes in any ap-
11 plication for a research grant awarded by the Foun-
12 dation a list of all Federal research funding received
13 by the principal investigator, as well as any funding
14 that is being requested as of that time;

15 (3) unpublished research results used to sup-
16 port a grant proposal made to the Foundation do
17 not include any knowing misrepresentations of data;

18 (4) principal investigators who have received
19 more than 5 years of Foundation funding at any
20 point in their careers, other than graduate and post-
21 doctoral traineeship awards, are only awarded addi-
22 tional research grants by the Foundation if they will
23 be contributing substantial original research under
24 the grant; and

1 (5) principal investigators who receive Founda-
2 tion research grant funding under more than one
3 grant at the same time have sufficient resources to
4 conduct the proposed research under each of those
5 grants appropriately under the terms of the grant.

6 **SEC. 115. COMPUTING RESOURCES STUDY.**

7 Not later than 1 year after the date of enactment
8 of this Act, the Comptroller General shall transmit to the
9 Congress a report detailing the results of a study on the
10 use of computing resources funded by the Foundation at
11 institutions of higher education. Such study shall assess—

12 (1) efficiencies that can be achieved by using
13 shared computing resources for projects that have
14 similar scientific computing requirements or projects
15 where specialized software solutions could be shared
16 with other practitioners in the scientific community;

17 (2) efficiencies that can be achieved by using
18 shared hardware that can be cost effectively pro-
19 cured from cloud computing services;

20 (3) efficiencies that can be achieved by using
21 shared software from an open source repository or
22 platform; and

23 (4) cost savings that could be achieved by po-
24 tential sharing of computing resources across all
25 Foundation grants.

1 **SEC. 116. ALTERNATIVE RESEARCH FUNDING MODELS.**

2 (a) IN GENERAL.—The Director of the Office of
3 Science and Technology Policy, in consultation with the
4 Director of the Foundation, shall identify and conduct ap-
5 propriate pilot programs to validate alternative research
6 funding models, including scientific breakthrough prize
7 programs.

8 (b) REPORT.—Not later than 1 year after the date
9 of enactment of this Act, and annually thereafter as part
10 of the annual budget submission to Congress, the Director
11 of the Office of Science and Technology Policy shall trans-
12 mit to the Congress a report on programs identified and
13 conducted under subsection (a).

14 **SEC. 117. REPEAL OF SUSTAINABLE CHEMISTRY BASIC RE-**
15 **SEARCH PROGRAM.**

16 Section 509 of the America COMPETES Reauthor-
17 ization Act of 2010 (42 U.S.C. 1862p–3) is repealed.

18 **SEC. 118. ROTATING PERSONNEL.**

19 The Director shall ensure that the cost to the Foun-
20 dation of employing individuals who are not permanent
21 employees of the Foundation, including individuals em-
22 ployed pursuant to the Intergovernmental Personnel Act
23 of 1970 (42 U.S.C. 4701 note), does not exceed the cost
24 of employing permanent employees of the Foundation to
25 perform the same functions.

1 **SEC. 119. REPORT OF THE NSB TASK FORCE ON ADMINIS-**
2 **TRATIVE BURDEN.**

3 The National Science Board Task Force on Adminis-
4 trative Burden shall provide a report to Congress on its
5 activities, findings, and recommendations within 90 days
6 after the date of enactment of this Act.

7 **SEC. 120. STUDY TO EVALUATE FEDERAL SCIENTIFIC**
8 **FUNDING OF NON-UNITED STATES CITIZENS.**

9 Not later than 18 months after the date of enactment
10 of this Act, the Comptroller General shall transmit to the
11 Congress a report detailing the results of a study, based
12 on quantifiable metrics, on non-United States citizens, in-
13 cluding students, postdoctoral researchers, research asso-
14 ciates, and tenure-track faculty, funded by Federal science
15 agencies that—

16 (1) evaluates their importance to the United
17 States scientific enterprise;

18 (2) quantifies their economic value and impact
19 to the United States; and

20 (3) assesses the Nation's economic opportunity
21 cost of those who return to their home countries, in
22 particular, quantifying contributions to the scientific,
23 technological, industrial, and educational base of
24 their final country of residence.

1 **TITLE II—SCIENCE, TECH-**
2 **NOLOGY, ENGINEERING, AND**
3 **MATHEMATICS**

4 **SEC. 201. FINDINGS; SENSE OF CONGRESS.**

5 (a) FINDINGS.—Congress finds the following:

6 (1) According to the National Science Board's
7 Science and Engineering Indicators, the science and
8 engineering workforce has shown sustained growth
9 for more than half a century and workers with
10 science and engineering degrees tend to earn more
11 than other comparable workers.

12 (2) According to the Program for International
13 Student Assessment 2009 results, America lags be-
14 hind many other nations when it comes to STEM
15 education. American students rank 23d in science
16 and 31st in math.

17 (3) Junior Achievement USA and ING recently
18 found a decrease of 25 percent in the number of
19 teens interested in STEM careers.

20 (4) According to a 2007 report from the De-
21 partment of Labor, industries and firms dependent
22 upon a strong science and math workforce pipeline
23 have launched a variety of programs that target K-
24 12 students and undergraduate and graduate stu-
25 dents in STEM fields.

1 (5) While the Federal Government spends near-
2 ly \$3 billion annually on STEM education related
3 programs and activities, finding ways to improve
4 STEM education activities beyond the scope of the
5 Federal Government is key to the future technical
6 and economic competitiveness of our Nation.

7 (b) SENSE OF CONGRESS.—It is the sense of Con-
8 gress that—

9 (1) more must be done to ensure that Federal
10 investment in STEM education is going to provide
11 a substantial return;

12 (2) leveraging private and nonprofit invest-
13 ments in STEM education will be essential to
14 strengthening the Federal STEM portfolio;

15 (3) strengthening the Federal STEM portfolio
16 may result in program consolidations and termi-
17 nations, but those changes should be made based on
18 evidence with stakeholder input;

19 (4) the President’s fiscal year 2014 budget pro-
20 posal did not adequately explain proposed consolida-
21 tions and cuts in the Federal STEM portfolio and
22 did not utilize outside expertise in making those crit-
23 ical decisions, resulting in the need for Congress to
24 limit the Administration’s forward movement on that
25 proposal; and

1 (5) coordinating STEM programs and activities
2 across the Federal Government in order to limit du-
3 plication and engage stakeholders will strengthen the
4 results of our Federal STEM education programs
5 and activities and in turn strengthen the United
6 States economy.

7 **SEC. 202. STEM EDUCATION ADVISORY PANEL.**

8 (a) **ESTABLISHMENT.**—The President shall establish
9 or designate a STEM Education Advisory Panel that in-
10 corporates key stakeholders from the education and indus-
11 try sectors within the President’s Council of Advisors on
12 Science and Technology.

13 (b) **QUALIFICATIONS.**—The Advisory Panel estab-
14 lished or designated by the President under subsection (a)
15 shall consist primarily of members from academic institu-
16 tions and industry. Members of the Advisory Panel shall
17 be qualified to provide advice and information on STEM
18 education research, development, training, implementa-
19 tion, interventions, professional development, or workforce
20 needs or concerns. In selecting or designating an Advisory
21 Panel, the President may also seek and give consideration
22 to recommendations from the Congress, industry, the sci-
23 entific community (including the National Academy of
24 Sciences, scientific professional societies, and academia),

12 curred in connection with the activities under-
13 taken to improve the competitiveness, manage-
14 ment, productivity, and technological perform-
15 ance of small and medium-sized manufacturing
16 companies.

17 “(C) AGREEMENTS WITH OTHER ENTI-

19 it is anticipated that a Center will enter into
20 agreements with other entities such as private
21 industry, institutions of higher education, and

3 on probation for one year, after which time the
4 panel shall reevaluate the Center. If the Center
5 has not addressed the deficiencies identified by
6 the panel, or shown a significant improvement
7 in its performance, the Director shall conduct a
8 new competition to select an operator for the
9 Center or may close the Center.

10 “(G) ADDITIONAL FINANCIAL SUPPORT.—
