Re: Recommendations of the Interventional Working Group of the Association for European Paediatric Cardiology (AEPC) for the Training in Interventional Catheterization for Congenital Heart Disease

I confirm as Secretary of the Association for European Paediatric and Congenital Cardiology that the AEPC Educational Committee and AEPC Council agreed for AEPC endorsement of the manuscript: Recommendations of the Interventional Working Group of the Association for European Paediatric Cardiology (AEPC) for the Training in Interventional Catheterization for Congenital Heart Disease.

The EC had already approved the manuscript. The AEPC council feels that you might change the title to "*AEPC recommendations for training in interventional catheterization for congenital heart disease*", as it emphasizes that is not merely a working group subject but strongly underscores that it is accepted for whole AEPC.

The AEPC Council very much appreciates the work that has been done and the high-quality manuscript that focusses on the needs of the pediatric population.

Thank you, very much and good luck, for the submission!

With my best wishes

Ina Michel-Behnke

AEPC Secretary General
