

**Appendix: “Voter Mobilization 101: Presidential Campaign Visits to Colleges and Universities in the 2016 Election”**

Christopher J. Devine, University of Dayton ([cdevine1@udayton.edu](mailto:cdevine1@udayton.edu))

<b>Parameter</b>	<b>Model 1</b>	<b>Model 2</b>	<b>Model 3</b>
Days Until Registration Deadline	0.015*	-	-
	(-0.007)	(-)	(-)
Days Until Start Date for Voting	-	0.013**	-
	(-)	(-0.005)	(-)
Days Until Election Day	-	-	0.013**
	(-)	(-)	(0.005)
Constant	-0.498	-0.480*	-0.332
	(-0.351)	(0.200)	(0.228)
N	132	210	210
Log-Likelihood	-70.842	-123.458	-122.788

Table A1: Predictors of Democratic (Clinton or Kaine) Campaign Visits to Universities in 2016

Entries are logistic regression coefficients. Robust standard errors are in parentheses.

\*\*\*p < 0.001; \*\*p < 0.01; \*p < 0.05; ^p < 0.10.

The dependent variable is coded one for a visit to a college or university campus, and zero for a visit to any other type of venue.

<b>Parameter</b>	<b>Model 1</b>	<b>Model 2</b>	<b>Model 3</b>
Days Until Registration Deadline	-0.009	-	-
	(0.009)	(-)	(-)
Days Until Start Date for Voting	-	-0.004	-
	(-)	(0.006)	(-)
Days Until Election Day	-	-	0.000
	(-)	(-)	(-0.006)
Constant	-2.909***	-2.537***	-2.433***
	(0.508)	(0.303)	(-0.340)
N	208	305	305
Log-Likelihood	-55.863	-86.317	-86.480

Table A2: Predictors of Republican (Trump or Pence) Campaign Visits to Universities in 2016

Entries are logistic regression coefficients. Robust standard errors are in parentheses.

\*\*\*p < 0.001; \*\*p < 0.01; \*p < 0.05; ^p < 0.10.

The dependent variable is coded one for a visit to a college or university campus, and zero for a visit to any other type of venue.
