National Tariff lines of Davos Countries

The 2012 APEC initiative called for a reduction in tariffs to no more than 5 per cent for APEC members by 2015. Each member was to identify EGs within its national tariff lines at the 8-digit, 10-digit or higher using guidelines in Annex C of the APEC declaration, as only these tariff lines were required to benefit from tariff reductions. In principle, negotiations under the Davos initiative will take place at the HS-6 digit 2012 classification. To get a more accurate estimate of tariff peaks, it is useful to see the number of tariff lines at the national level with tariff peaks. These are given in columns 5 and 6 in table A1.

Notes: Trade flows are for 2011. Bound and applied MFN tariffs are in simple average (s.a.). Tariff lines (TL) correspond to national tariff lines at 8-digit or 10-digit level of disaggregation.
