Figure A1: Parity between Membership and Leadership by Group

Notes: The maps depict the ratio of Percent Leaders divided by Percent Members for each group, averaged across both chambers in each state for the observed years of 2003-2014. A value of 1 indicates parity. Generally, more darkly shaded states are where a given group has a consistently stronger presence in leadership than membership, while more lightly shaded states are where each group has a consistently stronger presence in membership than in leadership.
