# 1 Experiment

### 1.1 Diagnostic checks

Diagnostic checks below; 0s are base categories. Joint tests of significance for Race x Profile Order Effects show that each combination of candidate race and profile are not jointly significant (Prob > F=.4739). Race x row position combinations are not jointly significant (Prob > F=.1401). Race x task effects are not jointly significant (Prob > F=.4472). This suggests that the design was successfully randomized.

Generally speaking, do you think of yourself as a Democrat, a Republican, an Independent, or something else?

Democrat Republican Independent Something else

Thinking about politics these days, how would you describe your own political viewpoint? Very liberal Liberal Moderate/Middle-of-the-Road Conservative Very conservative Not Sure

Linked fate (Dawson 1994): Do you think that what happens to [R'S GROUP] people in this country will have something to do with what happens in your life? Yes No

Identity (Mael and Tertrick 1992):

When someone criticizes R'S RACE, it feels like a personal insult. I don't act like the typical R'S RACE person.(REVERSE CODED) I'm very interested in what others think about R'S RACE. The limitations associated with R'S RACE apply to me also. When I talk about R'S RACE, I usually say "we" rather than "they." I have a number of qualities typical of R'S RACE. The successes of R'S RACE are my successes. If a story in the media criticized R'S RACE, I would feel embarrassed. When someone praises R'S RACE, it feels like a personal compliment. I act like a White person to a great extent.

Strongly disagree Disagree Somewhat disagree Neither agree nor disagree Somewhat agree Agree Strongly agree

Items were summed for each group so that higher values reflect greater identity with group. A new variable was then created to merge the scores into one variable. The scale for the entire sample was

split at the median where 1= individual score was 44 or greater, 0=else.
