

COA

Supplementary Figure 1. MYE gene fabric in control (CTR) and cocultured with non touching astrocytes (COA) Oli-neu cells. Red/blue lines indicate synergistic/antagonistic co-expression of the linked genes (connexin interlinkages in thicker lines). Genes: *Adam23* = a disintegrin and metallopeptidase domain 23; *Braf* = Braf transforming gene; *Galc* = galactosylceramidase; *Pxn* = paxillin; *Qk* = quaking; *Rela* = v-rel reticuloendotheliosis viral oncogene homolog A (avian); *Yy1* = YY1 transcription factor.
