

Supplementary Figure

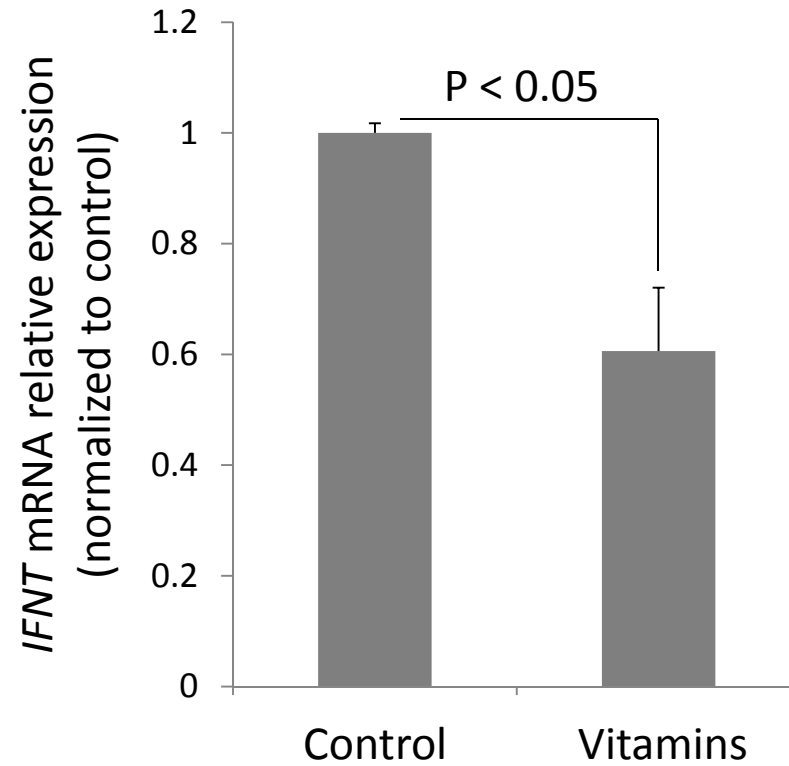

Fig. S1. Effect of RPMI-1640 vitamin mixture on the expression of interferon tau (IFNT) mRNA in bovine blastocysts. The same blastocyst samples used to generate the result shown in Fig. 2 were subjected to RT-qPCR analysis as described in Method section using IFNT specific primers: Forward; 5'-AGTGCTTCAACCTCTCCACAT-3' and Reverse; 5'-GTCCTTCTCTCCCATCACTGG-3'. P < 0.05 by t-test.
