## Supplemental 1: Quality assessment

Quality criteria for studies that described costs of interventions. Adapted from Stuhldreher et al (2013).

| Criterion | Description |
| :---: | :---: |
| Scope |  |
| Study objective | The objective(s) of the study was (were) defined. |
| Inclusion and exclusion criteria | Clear and objective inclusion and exclusion criteria were defined. |
| Disease and diagnostic criteria | The disease and its objective diagnostic criteria (ICD, DSM or valid disease-specific instruments) that were used to identify eligible patients were reported. |
| Non-depressed comparison group | The study included a non-depressed control group in order to calculate excess costs. |
| Calculation of costs |  |
| Currency | The currency in which the costs were calculated was reported in the text or was uncontroversial. |
| Reference year Perspective | All costs were valued at the price level of a stated base year (and inflated if necessary). The costs were analysed from the perspective of a patient, a payer or the society, the characteristics of the respective perspective were incorporated and the perspective was reported. |
| Costs incorporated from at least two major categories | The study estimated costs from the utilization of different kinds of health care services, but at least of two of the categories inpatient, outpatient, medication or indirect services, in order to consider at best all costs that accrue from the disease under study. |
| Data source | The source of information on healthcare utilization or costs was reported. |
| Valuation of costs | If data on healthcare utilization was collected, the source of unit costs was reported, in case cost data were used these reflected actual charges. |
| Study design and analysis |  |
| Missing data, imputation method | The proportion of missing data was reported and the way it was dealt with (e.g. imputation method) was described. |
| Sensitivity analyses | Relevant parameters were varied in univariate and/or probabilistic sensitivity analyses in order to test the robustness of the results. |
| Presentation of results |  |
| Sample size (subgroup) | The sample size of each group was reported. |
| Demographics | The characteristics of the sample were described; at least age and gender were reported. |
| Arithmetic mean costs | The cost estimates were presented as arithmetic means. |
| Standard deviations | Standard deviations of cost estimates were reported as a measure of variability or could be obtained by reported standard errors or confidence intervals. |
| Discussion |  |
| Results discussed with respect to other studies | The results were discussed in relation to other studies on the same topic, if any. |
| Limitations discussed | The limitations regarding in particular the calculation of costs were discussed in detail. |

## Supplemental 3: Forest plots of direct cost categories

Figure S3(1): Meta-analysis: Forest plot of outpatient excess costs

Figure S3(2): Meta-analysis: Forest plot of inpatient excess costs

Figure S3(3): Meta-analysis: Forest plot of medication excess costs

Figure S3(4): Meta-analysis: Forest plot of emergency excess costs

Figure S3(5): Meta-analysis: Forest plot of other direct excess costs

## Supplemental 4: Sensitivity Analysis

## Analysis (1): Exclusion of outliers

| Excess cost category | Subgroup | Outliers | Ratio of Means with outliers | Ratio of Means without outliers |
| :---: | :---: | :---: | :---: | :---: |
| Total direct costs | 1 | Chiu et al 2017 <br> Garis et al 2002 | $\begin{aligned} & \mathrm{RoM}=2.58[2.01,3.31] \\ & \mathrm{I}^{2}=99 \% \end{aligned}$ <br> Test for overall effect: $\mathrm{Z}=7.41(\mathrm{P}<0.00001)$ | $\begin{aligned} & \mathrm{RoM}=2.49[1.92,3.23] \\ & \mathrm{I}^{2}=99 \% \end{aligned}$ <br> Test for overall effect: $\mathrm{Z}=6.91(\mathrm{P}<0.00001)$ |
| Inpatient costs | 1 | Chiu et al 2017 <br> Garis et al 2002 | $\begin{aligned} & \mathrm{RoM}=2.82[1.94,4.08] \\ & \mathrm{I}^{2}=89 \% \\ & \mathrm{Z}=5.45(\mathrm{P}<0.00001) \end{aligned}$ | $\begin{aligned} & \mathrm{RoM}=2.66[1.90,3.72] \\ & \mathrm{I}^{2}=83 \% \\ & \mathrm{Z}=5.72(\mathrm{P}<0.00001) \end{aligned}$ |
|  | 4 | Dagher et al 2012 | $\begin{aligned} & \mathrm{RoM}=1.44[1.09,1.90] \\ & \mathrm{I}^{2}=25 \% \\ & \mathrm{Z}=2.59(\mathrm{P}=0.010) \end{aligned}$ | $\begin{aligned} & \mathrm{RoM}=1.35[1.08,1.70] \\ & \mathrm{I}^{2}=16 \% \\ & \mathrm{Z}=2.59(\mathrm{P}=0.010) \end{aligned}$ |
| Outpatient costs | 1 | Bosmans et al Chiu et al 2017 Garis et al 2002 | $\begin{aligned} & \mathrm{RoM}=1.85[1.64,2.10] \\ & \mathrm{I}^{2}=91 \% \\ & \mathrm{Z}=9.82(\mathrm{P}<0.00001) \end{aligned}$ | $\begin{aligned} & \mathrm{RoM}=1.95[1.78,2.14] \\ & \mathrm{I}^{2}=77 \% \\ & \mathrm{Z}=14.34(\mathrm{P}<0.00001) \end{aligned}$ |
|  | 2 | Luppa et al 2008 | $\begin{aligned} & \mathrm{RoM}=1.36[1.18,1.57] \\ & \mathrm{I}^{2}=55 \% \\ & \mathrm{Z}=4.25(\mathrm{P}<0.0001) \end{aligned}$ | $\begin{aligned} & \mathrm{RoM}=1.47[1.36,1.58] \\ & \mathrm{I}^{2}=0 \% \\ & \mathrm{Z}=10.42(\mathrm{P}<0.00001) \end{aligned}$ |
| Medication costs | 1 | Bosmans et al Garis et al 2002 | $\begin{aligned} & \mathrm{RoM}=2.89[2.16,3.86] \\ & \mathrm{I}^{2}=99 \% \\ & \mathrm{Z}=7.19(\mathrm{P}<0.00001) \end{aligned}$ | $\begin{aligned} & \mathrm{RoM}=2.26[1.97,2.59] \\ & \mathrm{I}^{2}=93 \% \\ & \mathrm{Z}=11.70(\mathrm{P}<0.00001) \end{aligned}$ |
|  | 4 | Williams et al 2005 | $\begin{aligned} & \mathrm{RoM}=1.35[1.04,1.75] \\ & \mathrm{I}^{2}=94 \% \\ & \mathrm{Z}=2.28(\mathrm{P}=0.02) \end{aligned}$ | $\begin{aligned} & \mathrm{RoM}=1.55[1.22,1.95] \\ & \mathrm{I}^{2}=91 \% \\ & \mathrm{Z}=3.67(\mathrm{P}=0.0002) \end{aligned}$ |
| Emergency costs | 1 | Chiu et al 2017 | $\begin{aligned} & \mathrm{RoM}=1.88[1.49,2.37] \\ & \mathrm{I}^{2}=90 \% \\ & \mathrm{Z}=5.33(\mathrm{P}<0.00001) \end{aligned}$ | $\begin{aligned} & \mathrm{RoM}=2.17[1.94,2.43] \\ & \mathrm{I}^{2}=47 \% \\ & \mathrm{Z}=13.51(\mathrm{P}<0.00001) \end{aligned}$ |
|  | 4 | Dagher et al 2012 | $\begin{aligned} & \operatorname{RoM}=1.62[1.27,2.08] \\ & \mathrm{I}^{2}=53 \% \\ & \mathrm{Z}=3.82(\mathrm{P}=0.0001) \end{aligned}$ | $\begin{aligned} & \mathrm{RoM}=1.57[1.37,1.80] \\ & \mathrm{I}^{2}=4 \% \\ & \mathrm{Z}=6.46(\mathrm{P}<0.00001) \end{aligned}$ |
| Other costs | 1 | Chiu et al 2017 <br> Garis 2002 | $\begin{aligned} & \mathrm{RoM}=2.31[1.65,3.24] \\ & \mathrm{I}^{2}=98 \% \\ & \mathrm{Z}=4.86(\mathrm{P}<0.00001) \end{aligned}$ | $\begin{aligned} & \mathrm{RoM}=2.08[1.53,2.82] \\ & \mathrm{I}^{2}=98 \% \\ & \mathrm{Z}=4.69(\mathrm{P}<0.00001) \end{aligned}$ |

## Analysis (2): Exclusion of studies in German language

| Excess cost category | Subgroup | German language studies | Ratio of Means with German language studies | Ratio of Means without German language studies |
| :---: | :---: | :---: | :---: | :---: |
| Total direct costs | 1 | Stamm et al 2010 | $\begin{aligned} & \mathrm{RoM}=2.58[2.01,3.31] \\ & \mathrm{I}^{2}=99 \% \end{aligned}$ <br> Test for overall effect: $\mathrm{Z}=7.41(\mathrm{P}<0.00001)$ | $\begin{aligned} & \mathrm{RoM}=2.51[1.94,3.26] \\ & \mathrm{I}^{2}=99 \% \end{aligned}$ <br> Test for overall effect: $\mathrm{Z}=6.92$ ( $\mathrm{P}<$ $0.00001)$ |
| Inpatient costs | 1 | Stamm et al 2010 | $\begin{aligned} & \mathrm{RoM}=2.82[1.94,4.08] \\ & \mathrm{I}^{2}=89 \% \\ & \mathrm{Z}=5.45(\mathrm{P}<0.00001) \end{aligned}$ | $\begin{aligned} & \mathrm{RoM}=2.80[1.86,4.21] \\ & \mathrm{I}^{2}=89 \% \\ & \mathrm{Z}=4.94(\mathrm{P}<0.00001) \end{aligned}$ |
| Medication costs | 1 | Stamm et al 2010 | $\begin{aligned} & \mathrm{RoM}=2.89[2.16,3.86] \\ & \mathrm{I}^{2}=99 \% \\ & \mathrm{Z}=7.19(\mathrm{P}<0.00001) \end{aligned}$ | $\begin{aligned} & \mathrm{RoM}=2.98[2.20,4.05] \\ & \mathrm{I}^{2}=99 \% \\ & \mathrm{Z}=7.05(\mathrm{P}<0.00001) \end{aligned}$ |

Subgroups:
$\begin{array}{ll}\text { 1= Depressed and non-depressed in adults } & 2=\text { Depressed and non-depressed in old age } \\ \text { 3= Depressed and non-depressed in adolescents } & \text { 4= Depression as comorbidity }\end{array}$

[^0]:    ${ }^{\text {a }}$ Reports also data for depression as comorbidity.
    ${ }^{\mathrm{b}}$ Reports also data for depressed and non-depressed in old age
    1= Depressed and non-depressed in adults; 2= Depressed and non-depressed in old age; 3= Depressed and non-depressed in adolescents; 4= Depression as comorbidity
