## ONLINE APPENDIX

## INCLUSION THRESHOLD

I apply different criteria for mergers and joint lists at the party and election levels of analysis. Recording the sheer number of parties involved in mergers and joint lists at the election level would give undue weight to these categories, as, by definition, two or more parties are involved in these types of party change (merger, joint list entry and joint list exit). As a consequence, mergers and joint lists changes would, by design, insert at least twice the weight of new party formations in the overall index. Empirically, this can be easily observed in Figure 1 in the text where the average number of parties participating in mergers, joint list entry and joint list exit is several times higher than the average number of new, disbanded or splinter parties in a given election. To correct for this, I record the number of new or modified mergers and joint lists, regardless of the number of parties comprising each. Accordingly, I implement the inclusion threshold at the level of mergers or joint lists rather than at the level of parties.

## Party-level data

New party: The $5 \%$ threshold is applied at $t$.
Disbanded party: The 5\% threshold is applied at $t-1$.
Splinter: The 5\% threshold is applied at $t$.
Merger: To exclude marginal parties from the index, at least two of the merged parties must have received $5 \%$ of the vote or more at $t-1$ and the merger must receive over $5 \%$ at $t$.
Joint lists (two indicators: entry, exit): To exclude marginal parties from the index, the 5\% threshold is applied as follows: for entry, at least two of the parties must have received $5 \%$ of the vote or more at $t-1$ and the joint list must receive over $5 \%$ at $t$; for exit, the joint list must have received $5 \%$ of the vote or more at $t-1$, and each of the parties must receive over $5 \%$ at $t$.

## Election-level data (EIP index)

New party: The $5 \%$ threshold is applied at $t$.
Disbanded party: The 5\% threshold is applied at $t-1$.
Splinter: The 5\% threshold is applied at $t$.
Merger: A merger is included in the index if it passed the $5 \%$ threshold at $t$.
Joint list (entry, exit): A new joint list forms part of the index when (a) a new joint list formed or a party entered an existing joint list and (b) the joint list passed the 5\% threshold at $t$. A disbanded joint list is included when (a) a joint list disbanded between elections $t$ and $t-1$ or a member of the joint list at $t-1$ abandoned it by $t$ and (b) the joint list received $5 \%$ of the vote or more at $t-1$.

## TABLE A. 1 LIST OF PARLIAMENTARY ELECTIONS

| Country | First election | Last election | Number of elections |
| :---: | :---: | :---: | :---: |
| Austria | November 23, 1986 | September 28, 2008 | 7 |
| Belgium | December 13, 1987 | June 13, 2010 | 6 |
| Bulgaria | June 10, 1990 | July 5, 2009 | 6 |
| Czech Republic | May 31, 1996 | May 28, 2010 | 4 |
| Denmark | September 8, 1987 | November 13, 2007 | 7 |
| Estonia | September 20, 1992 | March 6, 2011 | 5 |
| Finland | March 16, 1987 | April 17, 2011 | 6 |
| France | June 5, 1988 | June 10, 2007 | 4 |
| Germany | January 25, 1987 | September 27, 2009 | 6 |
| Greece | June 18, 1989 | October 4, 2009 | 8 |
| Hungary | March 25, 1990 | April 11, 2010 | 5 |
| Iceland | April 25, 1987 | April 25, 2009 | 6 |
| Ireland | February 17, 1987 | February 25, 2011 | 6 |
| Italy | March 28, 1994 | April 13, 2008 | 4 |
| Latvia | June 5, 1993 | October 2, 2010 | 5 |
| Lithuania | November 15, 1992 | October 12, 2008 | 4 |
| Netherlands | September 6, 1989 | June 9, 2010 | 6 |
| Norway | September 11, 1989 | September 14, 2009 | 5 |
| Poland | October 27, 1991 | October 21, 2007 | 5 |
| Portugal | July 19, 1987 | September 27, 2009 | 6 |
| Romania | May 20, 1990 | November 30, 2008 | 5 |
| Slovakia | June 9, 1990 | June 12, 2010 | 5 |
| Slovenia | April 8, 1990 | September 21, 2008 | 5 |
| Spain | October 29, 1989 | March 9, 2008 | 5 |
| Sweden | September 18, 1988 | September 19, 2010 | 6 |
| Switzerland | October 18, 1987 | October 21, 2007 | 5 |
