Double Edged Blades: Re-visiting the British (and Irish) Flint Daggers

By CATHERINE J. FRIEMAN

APPENDIX: CATALOGUE OF BRITISH (AND IRISH) FLINT DAGGERS

This catalogue contains all known flint daggers with British (and Irish) find locations. The information collected relies on archival research in various county HERs and through the use of the Heritage Gateway online resource; on consultation of published catalogues, excavation reports etc; and on visits to numerous Museum collections. All observations of use-wear are macro-scopic and assessed through the use of a 10× hand lens.

The Museums below have been visited and the contents of their collections verified; the rest are recorded based on published information and may be out of date:

Ashmolean Museum, Oxford
Barbican Museum, Lewes
Birmingham City Museum, Birmingham
BM: British Museum, London
Central Museum, Southend
CMAA: University of Cambridge Museum of Archaeology and Anthropology
Glasgow Art Gallery and Museum, Glasgow
HERM: Hull and East Riding Museum, Hull
Hunterian Museum, Glasgow
Ipswich Museum, Ipswich
Lynn Museum, King's Lynn
Museum of Somerset, Taunton
NMS: National Museums Scotland, Edinburgh
NMW: National Museum of Wales, Cardiff
North Lincolnshire Museum, Scunthorpe
Norwich Castle Museum, Norwich
Pitt Rivers Museum, Oxford
Royal Cornwall Museum, Truro
Royal pavilion, Brighton
The Castle Museum, Colchester
The Collection, Lincoln
Townley Hall Museum, Burnley
Wiltshire Museum, Devizes

Measurement abbreviations are as follows:

L: Length
BL.L: Blade length
Ta.L: Tang length
BL.W: Maximum blade width
Ta.W: Maximum tang width
Pt.Max.W.: Point of maximum width from tip
Ta.Th.: Maximum tang thickness
Bl.Th.: Maximum blade thickness
1. UK/Ireland
BM (2005,0501.985)
L. 126mm; Bl.L. 87mm; Ta.L. 39mm; Bl.W. 29mm; Ta.W. 31mm; Pt.Max.W. 95mm; Ta.Th. 9mm; Bl.Th. 7mm
Short-tanged dagger. Near complete dagger with very tapered tang edges. Refined manufacture technique with invasive sub-parallel retouch on both faces. Profile thickens towards butt end, but is slim throughout. Possibly resharpened. Wear on blade consists of blunting and small fractures along the edges and some rounding on the faces. Tang edges and faces are rounded with some irregular flaking visible on tang faces. Dark brown flint with irregular yellowish-brown patination which becomes more homogeneous towards the butt end. Surface is glassy, matte and homogeneous with only one visible inclusion. Opaque. No cortex present.
No contextual information available.

2. UK/Ireland
BM (2005,0501.984)
L. 146mm; Bl.W. 66mm; Pt.Max.W. 59mm; Bl.Th. 23mm
Class 4. Possible preform. Complete dagger of medium refinement. Very tapered tang edges and pointed butt. Scaled flaking covers both faces. Profile thickest at point of maximum width in the blade area. Unresharpened. Wear on blade consists of irregular flaking on edges, handling polish and rounding on faces. Tang edges show blunting and crushing, tang faces are rounded. Pale grey flint mottled with light brownish-grey. Surface is glassy, shiny and inhomogeneous with many small, cherty inclusions. No cortex is present.
No contextual information available.

3. UK
Weston Park Museum, Sheffield (J93.387)
No morphological information available.
No contextual information available.

4. England
CMAA (Z 32161)
No morphological information available.
No contextual information available.

5. Unknown (likely London), Britain
MOL (O1028)
L. 153mm; Bl.L. 71mm; Ta.L. 82mm; Bl.W. 61mm; Ta.W. 58mm; Pt.Max.W. 61mm; Ta.Th. 12mm; Bl.Th. 10mm
Class 1. Complete flint dagger with tip. Tang edges somewhat tapered to flat butt. Refined manufacture technique. Scaled retouch covers both faces. In profile it is evenly lenticular with the thickest point at the junction of blade and tang. Four definite notches: one pair near the junction and two further on one edge. Rather deep flake scars on tang edges might have been made or used as notches. Resharpened. Wear includes minimal flaking along blade edges, handling polish and rounding on blade faces, crushing and grinding on tang edges and rounding and handling polish on tang faces. A polished facet is present near the base. Butt end and part of blade are opaque black, tip end is dark grey mottled with small black dots. Surface is somewhat granular, reasonably homogeneous and matte. Partially translucent. No inclusions present. No cortex visible.
No contextual information available.

6. Unknown (likely London), Britain
MOL (O1034)
L. 145mm; Bl.L. 72mm; Ta.L. 73mm; Bl.W. 46mm; Ta.W. 41mm; Pt.Max.W. 54mm; Ta.Th. 9mm; Bl.Th. 8mm
Class 3. Complete dagger with tip. Tang edges are somewhat tapered and butt is rather rounded but with a point. Manufacture technique is refined. Scaled retouch covers both faces. Profile is somewhat plano-convex and thickens to junction of blade and tang. Resharpened. Wear includes minimal flaking along blade edges, rounding on tang edges and some irregular handling polish on one face on both the blade and tang. Brownish patinated flint with a reasonably homogeneous appearance. Diagonal grey and black linear across blade. Surface is glassy and shiny. Highly translucent. A few discrete and irregular cherty inclusions are present. No cortex is present.
No contextual information available.

7. Unknown (likely London), Britain
MOL (O1031 [not located])
No morphological information available.
No contextual information available.

8. Unknown (likely London), Britain
MOL (O711 [lost])
No morphological information available.
No contextual information available.
9. Thames
Wiltshire Museum, Devizes (DZWS:1992.79)
L. 227mm; Bl.L. 111mm; Ta.L. 116mm; Bl.W. 55mm; Ta.W. 48mm; Pt.Max.W. 73mm; Ta.Th. 22mm; Bl.Th. 24mm
Class 4. Complete dagger preform with tip. Extremely long and thick. Tang edges somewhat tapered, base rounded. Manufacture technique is somewhat refined. Scaled retouch covers both faces. In profile it is oval to lenticular with the thickest point at the point of maximum width. Unresharpened. Wear includes rounding on blade edges, crushing and rounding on tang edges, both faces show rounding, perhaps from rolling underwater. Fully patinated dark brown with lighter grey showing through flint along edges. Surface is glossy, shiny and somewhat homogeneous. Some small possibly cherty inclusions are present but difficult to distinguish due to patination. Opaque. Small area of cortex encircled by darker transition zone present on one blade face.
Found in the River Thames.

10. Blows Moss, South Ronaldsay, Orkney
Glasgow Art Gallery and Museum (A.1955.96.ch)
L. 134mm; Bl.L. 60mm; Ta.L. 74mm; Bl.W. 47mm; Ta.W. 43mm; Pt.Max.W. 51mm; Ta.Th. 7mm; Bl.Th. 6mm
Class 3. Complete dagger with tip present. Tang edges somewhat tapered, butt end rounded. Refined manufacture technique. Both faces covered largely in scaled retouch, but sub-parallel oblique retouch is present on one face. Handle edges somewhat rough and slightly denticulated, but not quite notched. In profile it is lenticular and very slim. Polished facet near the base end. Resharpened to the point that blade is slightly asymmetrical. Wear on blade includes small flake scars around the edges and handling polish on both faces. Wear on tang comprises crushing and rounding at the edges and near the base and irregular areas of handling polish on the faces. Extremely variegated light grey flint with lighter and darker grey mottling. Surface is very glassy and shiny. Largely opaque. Structure is quick inhomogeneous with numerous cherty inclusions which evidently proved somewhat challenging to knap across. Small area of cortex is present on one tang face at the base end.
Found 1888 during peat cutting.
Callander 1931; Evans 1897; Scott 1962

11. Braes of Glenlivet (Clachdhu), Inveravon, Moray
Elgin Museum
Cast of a flint dagger. No morphological information available.
Found on the Clachdhu, Braes of Glenlivet.

12. Deeside, Aberdeenshire
NMS (X.AA.75)
L. 105mm; Bl.L. 75mm; Ta.L. 20mm; Bl.W. 41mm; Ta.W. 37mm; Pt.Max.W. 51mm; Ta.Th. 6mm; Bl.Th. 8mm
Found within a short cist.
PSAS 1892–3

13. Guthrie Estate, Guthrie, Angus
Unknown collection
L. 165mm; Bl.W. 38mm; Complete flint dagger. Described as being a pale straw colour blended with pale blue, probably indicating partial cortication.
Found in a cairn.
Evans 1897; Gomme 1886

14. Kirkbuddo, Inverarity, Angus
NMS (X.AA.58)
L. 93mm; Bl.L. 62mm; Bl.W. 52mm; Pt.Max.W. 62mm; Bl.Th. 8mm
Possibly Class 1. Fragment of dagger comprising blade and part of tang. Refined manufacture technique. Scaled retouch covers both faces. In profile lenticular thickening markedly to butt end. Three pairs of deep notches present on tang edges near junction. Resharpened. Some flaking present along blade edges and handling polish on both faces at junction. Tang edges polished and rounded. Highly variegated grey–brown flint. Unpatinated. Surface glassy and shiny. Largely translucent. Largely inhomogeneous with several inclusions of various sizes which appear to be rather tenacious and disrupt the object form. No cortex present. Apparent single find near a tumulus containing Beaker ceramics.
NMAS 1892
15. Carsie, Blairgowrie, Perth and Kinross
NMS (X.AA.220)
L. 97mm; Bl.L. 72mm; Bl.W. 53mm; Pt.Max.W. 63mm; Bl.Th. 10mm
Fragment of possible dagger blade and partial tang. Manufacture technique somewhat refined. Scaled flaking covers both faces. In profile, lenticular but rather uneven, thickest near blade tip. Resharpened. Irregular flaking present on both blade edges, one edge also somewhat crushed. Partial tang edges show rounding. Handling polish present on both faces. Somewhat variegated brownish grey flint. Unpatinated. Surface very glassy and shiny. Thinner areas somewhat translucent. Very homogeneous with no inclusions. No cortex is present.
No contextual information available.

16. Ghost Knowe, Craigengelt, Stirling
Lost
A complete flint dagger. Described as being extremely long.
Found in a cist with a skeleton wrapped in decayed organic material, a stone battle axe and possibly other material under a covering cairn.
Wilson 1851

17. Nunraw, Haddington, East Lothian
NMS (AA 1)
L. 183mm; Bl.L. 98mm; Ta.L. 85mm; Bl.W. 65mm; Ta.W. 55mm; Pt.Max.W. 74mm; Ta.Th. 9mm; Bl.Th. 8mm
Single find apparently in the vicinity of a Beaker cist.
NMAS 1892; PSAS 1889

18. Pentland Hills, Midlothian
NMS (X.AA.187)
L. 126mm; Bl.L. 82mm; Ta.L. 44mm; Bl.W. 29mm; Ta.W. 26mm; Pt.Max.W. 52mm; Ta.Th. 9mm; Bl.Th. 8mm
No contextual information is available.

19. Crawford Moor (Potrail Burn), Glenochar, Crawford, South Lanarkshire
NMS (X.AA.284; X.EQ 53)
L. 174mm; Bl.L. 85mm; Ta.L. 89mm; Bl.W. 54mm; Ta.W. 53mm; Pt.Max.W. 63mm; Ta.Th. 8mm; Bl.Th. 7mm
Class 1. Complete flint dagger with tip. Manufacture technique refined. Tang edges somewhat tapered, base end flat. Scaled retouch covers both faces. Lenticular in profile, thickens slightly to handle. Heavily resharpened. Wear includes flaking along blade edges, irregular areas of handling polish near junction on both blade faces and some irregular rounding on the tang edges. The tang is considerably less worn than the level of resharpening would imply. Variegated pale grey flint darkening significantly towards base. Surface somewhat granular and matte. Largely opaque. Somewhat homogeneous with a few very small inclusions and one larger one on the blade which disrupts the object form. Cortex surrounded by darker transition zone present at the base and on one tang face.
Found in a cairn.
Anderson & Black 1888; PSAS 1967; RCAHMS 1978; Ritchie & Shepherd 1973; Truckell 1966

20. Biggar Common (cairn 2), Biggar, South Lanarkshire
Biggar Museum
L. 117mm; Bl.W. 48mm; Ta.Th. 7mm
Found with Seamer type flint axe underneath western edge of cairn, but not directly associated with funerary deposits.
Johnston 1997
21. ["Grey Hill Farm near Luce Bay"] Lochgoin, East Ayrshire
Glasgow Art Gallery and Museum (A.1967.2.c)
L. 119mm; Bl.L. 50mm; Ta.L. 69mm; Bl.W. 57mm; Ta.W. 53mm; Pt.Max.W. 50mm; Ta.Th. 8mm; Bl.Th. 8mm
No contextual information available.

22. Blakelaw, Linton, Berwickshire, Scottish Borders
NMS (X.AA.257)
L. 87mm; Bl.W. 55mm; Pt.Max.W. 50mm; Bl.Th. 7mm
No contextual information available.

23. Stofield ["Stotfield"], Edgerston, Roxburghshire, Scottish Borders
NMS (X.AA.209)
L. 125mm; Bl.L. 89mm; Ta.L. 36mm; Bl.W. 51mm; Ta.W. 39mm; Pt.Max.W. 73mm; Ta.Th. 6mm; Bl.Th. 8mm
No contextual information available.

24. Lilburn Steads, Wooler, Northumberland
Glasgow Art Gallery and Museum (1894.168b)
L. 135mm; Bl.L. 77mm; Ta.L. 58mm; Bl.W. 50mm; Ta.W. 46mm; Pt.Max.W. 50mm; Ta.Th. 8mm; Bl.Th. 6mm
Class 4. Complete flint dagger with tip. Manufacture technique refined. Tang edges very tapered, base end irregular but largely rounded. Scaled retouch covers both faces. In profile, very thin and lenticular; noticeably thicker at base end. Possibly resharpened. Wear includes irregular flaking along blade edges, irregular areas of handling polish on both blade faces and rounding along the tang edges. Very fine dark brownish-grey flint mottled with curvilinear and circular black areas. Surface very glassy and shiny. Fully translucent. One inclusion near blade tip disrupts object form. Ground and polished area of cortex present on base.
Found with a Beaker in a cist.
Grimes 1932 (Cat. No. 77); Smith 1919

25. Highfield Hope, Tarset with Greystead, Northumberland
Unknown collection
Northumbria HER (N7064)
URL: http://www.keystothepast.info/durhamcc/K2P.nsf/K2PDetail?readform&PRN=N7064
L. 125mm; Bl.W. 57mm
Jobey 1967

26. Hethersgill, Carlisle, Cumbria
Private collection
Cumbria HER (42331)
URL: http://finds.org.uk/database/artefacts/record/id/6288
L. 129mm; Bl.W. 43mm
Herepath 2001

27. Irthington, Cumbria
BM (Sturge.472)
L. 143mm; Bl.L. 69mm; Ta.L. 74mm; Bl.W. 46mm; Ta.W. 48mm; Pt.Max.W. 70mm; Ta.Th. 11mm; Bl.Th. 11mm
inhomogeneous with a few rough inclusions of various sizes irregularly distributed. Ground and polished area of cortex at base surrounded by dark transition zone.  
No contextual information available.  
Grimes 1932 (Cat. No. 26); Smith 1919

28. Yorkshire
BM (+.3994)
L. 122mm; B.L. 66mm; Ta.L. 56mm; B.W. 47mm; Ta.W. 44mm; Pt.Max.W. 66mm; Ta.Th. 8mm; Bl.Th. 9mm
Class 2. Complete flint dagger with tip. Manufacture technique refined. Tang edges very tapered, pointed base end. scaled retouch present on both faces, sub-parallel retouch present on one face. Four pairs of notches along tang edges. Resharpened. Wear comprises flaking along blade edges, irregular areas of handling polish on blade faces. Tang edges blunted, irregular areas of flaking and handling polish on tang faces. Somewhat variegated grey flint, darker at the edges and lighter to the centre with white mottling. Surface very glassy and shiny. Somewhat opaque. Homogeneous with one visible inclusion at centre of the blade. No cortex present.  
No contextual information available.

29. Yorkshire
Manchester Museum
No morphological information available.  
No contextual information available.  
Grimes 1932

30. Yarm, Stockton on Tees, Cleveland, North Yorkshire
Private Collection
URL: http://finds.org.uk/database/artefacts/record/id/237357
L. 156mm; B.W. 42mm
Single find.  
Andrews-Wilson 2008

31. Speeton, North Yorkshire
Private collection
No morphological information available.  
No contextual information available.  
Grimes 1932 (Cat. No. 134)

32. Cayton Carr, Scarborough, North Yorkshire
Scarborough Museum
North Yorkshire HER (MNY12590)

34. Snainton, North Yorkshire
BM (Sturge.2213)
L. 136mm; B.L. 115mm; Ta.L. 24mm; B.W. 45mm; Ta.W. 41mm; Pt.Max.W. 115mm; Ta.Th. 7mm; Bl.Th. 11mm
No contextual information available.
35. near Pickering, North Yorkshire
Weston Park Museum, Sheffield (J.93-169)
No morphological information available. Museum catalogue lists this object as a plano-convex knife.
Part of funerary assemblage: found at right hand of crouched inhumation which was also accompanied by polished stone axe and sub-adult skeletal material at feet under a large stone south of the centre of a barrow.
Grimes 1932 (Cat. No. 132); Howarth 1899

36. Topcliffe, North Yorkshire
BM (1875,0403.131)
L. 115mm; B.L. 63mm; Ta.L. 52mm; B.W. 36mm; Ta.W. 35mm; Pt.Max.W. 48mm; Ta.Th. 9mm; Bl.Th. 9mm
No contextual information is available.
Grimes 1932 (Cat. No. 135); Smith 1919

37. Acklam Wold (B 124), Woong Nab, Ryedale, North Yorkshire
HERM (1942.252a)
North Yorkshire HER (MNY2038)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNY2038&resourceID=1009
L. 179mm; B.L. 98mm; Ta.L. 81mm; B.W. 56mm; Ta.W. 54mm; Pt.Max.W. 69mm; Ta.Th. 12mm; Bl.Th. 9mm
Part of funerary assemblage at centre of a barrow: Found below right hand of crouched inhumation (?m) on top of a flint flake, with a v-perforated jet button placed at the tip and touching a nodule of iron pyrite. Assemblage also included an amber button, Gray 1908; Grimes 1932 (Cat. No. 126); Mortimer 1905; Smith 1919

38. North Rigton, Harrogate, North Yorkshire
Unknown collection
North Yorkshire HER (MNY19296)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNY19296&resourceID=1009
No morphological information available.
Single find.

39. Reighton, East Yorkshire (originally published as: Brighton, Sussex)
Blackgate Museum, Newcastle-on-Tyne
East Sussex HER (MES285)
No morphological information available.
No contextual information available.
Curwen 1932; 1941; Grimes 1932 (Cat. No. 105)

40. Garton Slack (B 37), Garton, East Yorkshire
HERM (1942.267a)
Humber HER (15506)
L. 166mm; B.L. 80mm; Ta.L. 86mm; B.W. 52mm; Ta.W. 49mm; Pt.Max.W. 60mm; Ta.Th. 9mm; Bl.Th. 8mm
Class 3. Complete flint dagger with tip. Manufacture technique refined. Tang edges somewhat tapered, butt end rounded with point. Scaled retouch covers both faces. Lenticular in profile, thickening to tang. Resharpened. Wear comprises flaking along blade edges, irregular areas of grinding and polishing on blade faces, rounding on tang edges and faces. Pale grey flint growing darker and more translucent to base. Blue–white cortication nearly covers one face and covers much of the other. Heavy iron staining on less corticated face. Surface glassy and shiny. Somewhat translucent. Somewhat homogeneous with a few small inclusions. Two ground and polished areas of cortex surrounded by transition zone present on same side, one near the blade tip, one near the butt end.
Part of funerary assemblage under a barrow: Found behind head of crouched inhumation (burial no. 6 within the barrow), leaning against Beaker along with polished stone axe, flint flake, iron pyrite and v-perforated jet button.
Gray 1908; Greenwell 1877; Grimes 1932 (Cat. No. 129); Mortimer 1905; Smith 1919; Thurnam 1871
41. Garton Slack (B 152) [C 52], East Yorkshire
HERM (1942.269a)
Humber HER (4331)
L. 154mm; Bl.L. 75mm; Ta.L. 79mm; Bl.W. 72mm; Ta.W. 66mm; Pt.Max.W. 74mm; Ta.Th. 9mm; Bl.Th. 7mm
Part of a funerary assemblage under a barrow: Found under the skull of a crouched inhumation (?m) (interment no. 5 in the barrow) with a v-perforated jet button, flint knife and a bronze ?awl.
Grimes 1932 (Cat. No. 130); Mortimer 1905; Smith 1919

42. Wetwang, East Yorkshire
Unknown collection
Humber HER (3924)
No morphological information available.
Found in a barrow.
Thurnam 1871

43. Huggate, East Yorkshire
HERM (1942.278.6)
Humber HER (17859)
Ta.L. 65mm; Ta.W. 47mm; Ta.Th. 10mm
Class 3. Tang part of flint dagger. Manufacture technique is refined. Tang edges are very tapered, base end rounded. Scaled retouch covers both faces. Four pairs of notches along tang edges. Lenticular in profile, thickens to base. Wear on tang comprises irregular areas of rounding on the edges and handing polish on the faces at the junction. Pale brownish–grey flint. Unpatinated. Some iron staining on one face. Surface glassy and shiny. Opaque. Largely homogeneous with a few irregularly distributed inclusions which are rough and tenacious, disrupting the object form. No cortex is present.
No contextual information available.

44. Middleton-on-the-Wolds, East Yorkshire
HERM (1942.94b [display])
Humber HER (3852)
Class 3. Complete flint dagger with tip present. Tang edges somewhat tapered and base end rounded. Iron staining on one face. Part of funerary assemblage recovered in a sand pit: Found leaning against Beaker with a flint flake, a flint tool, an iron pyrites nodule, two bone pins and two jet buttons alongside a crouched inhumation.
Grimes 1932 (Cat. No. 131); Mortimer 1908; Sheppard 1908; Smith 1919

45. Cottingham, East Yorkshire
HERM (1942.278.1 [display])
Humber HER (859)
No contextual information available.
Grimes 1932 (Cat. No. 128); Sheppard 1910; 1920

46. Clay Hall farm, Cottingham, East Yorkshire
Private collection
Humber HER (858)

47. Greenwold, East? Yorkshire
HERM (1942.278.5)
Ta.L. 78mm; Ta.W. 58mm; Ta.Th. 8mm
No contextual information available.
HERM (1942.278.2 [display])
No morphological information available.
No contextual information available.

49. Widdop Reservoir, Heptonstall (near Wadsworth), Calderdale, West Yorkshire
Private collection
West Yorkshire HER (3871)
Fragment of a flint dagger.
Single find within larger flint scatter.

50. West Gorple Reservoir, Heptonstall, Calderdale, West Yorkshire
Private collection
West Yorkshire HER (5901)
Single find.
Myers & Noble 2009; Yorkshire Archaeological Society 2008

51. Ferrybridge (Barrow 154: SK19), Knottingley, West Yorkshire
Unknown collection
L. 152mm; Bl.W. 58mm; Ta.Th. 6mm; Bl.Th. 8mm
Class 3. Complete flint dagger with tip. Manufacture technique refined. Tang edges very tapered, base end pointed. Scaled retouch covers both faces. Thickens slightly to tang. Two pairs of notches on tang edges as well as a third unpaired notch on one edge. Fully corticated.
Part of a funerary assemblage secondary burial under a barrow (dagger 52 from primary inhumation within the same barrow): found by feet of crouched adult male inhumation along with a Beaker, a plano-convex knife, three barbed-and-tanged flint arrowheads, two bone spatulae and a flint scraper.
Roberts 2005; Vyner 2008

52. Ferrybridge (Barrow 154: SK26), Knottingley, West Yorkshire
Unknown collection
L. 152mm; Bl.W. 58mm; Ta.Th. 8mm
Part of a funerary assemblage centred under a barrow (dagger 51 from secondary inhumation within the same barrow): found at feet of crouched adult male inhumation along with a Beaker.
Roberts 2005; Vyner 2008

53. Ferry Fryston (mound II), Knottingley, West Yorkshire
Wakefield city Museum
West Yorkshire HER (1298)
Part of a funerary assemblage within a barrow: Found behind pelvis of adult male crouched inhumation along with other fragments of human bone.
Pacitto 1969; Roberts 2005; Vyner 2008

54. Kitching Farm, Stanley, Wakefield, West Yorkshire
Wakefield city Museum
West Yorkshire HER (1534)
L. 119mm
Class 1. Complete flint dagger with tip. Tang edges somewhat tapered, base end pointed. Possibly resharpened. Possibly some hafting residue present near the butt end. Mottled yellowish–brown flint. Large area of cortex present at the base, extending onto one face of the tang.
Single find within a larger flint scatter.
Anon. 1932; Walker 1934

55. 37/39 St. Sepulchre Gate, Doncaster, West Yorkshire
Doncaster Museum
South Yorkshire HER (03351/01 & 00668/01)
http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MSY11069&resourceID=1027 &
http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MSY9483&resourceID=1027
L. 171mm; Bl.W. 70mm; Ta.Th. 6mm

Found in an old shaft with two inhumations (one wearing a ring) and roman coins. Likely not the original context.

*Smedley 1951*

56. Wombwell Wood, Darfield, Barnsley, South Yorkshire
Weston Park Museum, Sheffield (1977.224)
South Yorkshire HER (03030/01)
Recorded in Museum catalogue as fragmented.

Single find.

57. Lancashire?
Townley Hall Museum, Burnley (1908.1.1 [missing])
No morphological information available.
No contextual information available.

58. Pendle, Lancashire
Private collection
No morphological information available.
No contextual information available.

59. Roggerham, Burnley, Lancashire
Townley Hall Museum, Burnley (no label – identified by dimensions)
L. 114mm; B.L. 65mm; Ta.L. 49mm; B.W. 55mm; Ta.W. 50mm; Pt.Max.W. 65mm; Ta.Th. 8mm; B.Th. 8mm
Class 2. Complete flint dagger with tip. Manufacture technique refined. Tang edges somewhat tapered, base end flat. Scaled retouch covers both faces. In profile, slightly plano-convex, thickest point at junction of blade and tang. Resharpened. Wear consists of flaking along blade edges, irregular areas of handling polish on one blade face, crushing and rounding on tang edges. Somewhat variegated dark grey and black flint, lightly mottled with tiny white features. Surface glassy and shiny. Somewhat translucent. Largely homogeneous with one large, pale grey inclusion visible on one surface. No cortex present.

Single find.

*Barnes 1982; Bennett 1946; Myers & Noble 2009*

60. Worsthorne Moors, Burnley, Lancashire
Townley Hall Museum, Burnley (no label – identified by dimensions)
Lancashire HER (PRN1158 - MLA1158)
L. 160mm; B.L. 84mm; Ta.L. 76mm; B.W. 58mm; Ta.W. 48mm; Pt.Max.W. 61mm; Ta.Th. 10mm; B.Th. 8mm
Class 2. Complete flint dagger with tip. Manufacture technique refined. Tang edges very tapered, base end rounded. Lenticular in profile, thickens to tang. Possibly resharpened. Wear comprises flaking along blade edges, rounding on tang edges, and irregular areas of handling polish on tang faces. Highly variegated brownish–grey flint mottled with tiny black dots and with darker areas at tip and base. Surface glassy and shiny. Somewhat translucent. Largely inhomogeneous with a large grey inclusion at one blade edge which disrupted the object form and a white linear feature possibly intended to be prominently visible. Tiny area of polished and ground cortex surrounded by transition zone present on butt end.

No contextual information available.

131. Irthlingborough (barrow 1), Stanwick, Raunds, Northamptonshire
Unknown collection
Northamptonshire HER (1765/0/1)
Class 3. Complete flint dagger with tip. Manufacture technique refined. Tang edges somewhat tapered, butt end rounded but with a point. Scaled retouch covers both faces. Polish on edges and arrises of blade interpreted as wear from sheath.
Part of a funerary assemblage within a plank chamber under a barrow: Found at feet of crouched male inhumation in a compact pile with three cattle rib spatulae, a boar's tusk, five v-perforated jet buttons, an amber ring, a slate sponge finger, a broken bracer reused as a sponge finger, an unfinished triangular arrowhead, two flint knives, two scrapers, a retouched flake, a partial core and five unretouched flakes alongside a long-necked Beaker.

132. West Cotton (barrow 6), Stanwick, Raunds, Northamptonshire
Unknown collection
Northamptonshire HER (5390/0/2)
Part of a funerary assemblage within a pit at the centre of mound: Found below feet of crouched male inhumation in a stack with flint flake, incised chalk piece and v-perforated flint button along with a long-necked beaker and a flint knife. Disarticulated remains of two further individuals (dated late 4th millennium BC) in a small pit below the crouched inhumation.

Hilted Scandinavian dagger. Complete flint dagger with tip. Manufacture technique refined. Hilt edges parallel, butt end rounded. Parallel and sub-parallel oblique flake scars present on both faces. Thickens markedly to hilt. Unresharpened. Wear comprises irregular flaking along blade edges, extensive rounding and polishing along hilt edges and rounding on both hilt faces. Indications of a crude zig-zag ridge present on hilt edges near junction, likely worn off on the rest of hilt. Light grey flint with tiny white circular and sub-linear features. Surface glassy and matte. Totally opaque. Somewhat inhomogeneous with a few discrete inclusions near junction and on hilt. Area of ground and polished cortex present on base edge. Context unclear: possibly associated with two Beakers and another flint dagger (140). Association is dubious as this form of flint dagger post-dates main period of British Beaker deposition. Thomas 1956; 1964

Class 3. Complete flint dagger with tip. Manufacture technique refined. Tang edges very tapered, butt end pointed. Scaled retouch covers both faces. In profile, thickens to centre of tang. Two pairs of notches along tang edges. Unresharpened. Wear comprises flaking along blade edges, handling polish on blade faces, blunting and rounding along tang edges and handling polish on tang faces. Criss-cross black traces of binding present near the tangs on both faces. Fully corticated flint. Surface somewhat granular and matte. Totally opaque. Somewhat inhomogeneous with a few cherty grey inclusions which were evidently difficult to knap but do not affect object form. Tiny flecks of rough, white cortex present on tip of blade and point of base.
Part of a funerary assemblage at the centre of a ring ditch: Found near feet of crouched adult male inhumation along with Beaker, flint flake and two backed flint knives.
Barclay et al. 1995

148. Llanelieu, [Brecknockshire] Powys, Wales
NMW (78.31 H)

Class 2. Complete flint dagger with tip. Tang edges somewhat tapered, butt end flat. Scaled retouch covers both faces. Lenticular in profile, thickening to butt. Resharpened. Wear comprises flaking along blade edges, handling polish on both blade faces at junction, rounding along both tang edges and faces. An area of striated polish from the manufacture process is present at the centre of one blade face. Variegated brownish–grey flint. Surface glassy and shiny. Opaque. Homogeneous with only a few tiny whitish curvilinear features. No cortex present.
Part of a funerary assemblage within a cairn: Found with a ceramic vessel.
Grimes 1932 (Cat. No. 6); Banks 1871; Smith 1919; Jones 1911; Green et al 1982; Savory 1963

149. Ty Ddu, Ystradfellte, Powys, Wales
NMW (98.28/1)
L. 158mm; Bl.L. 78mm; Ta.L. 80mm; Bl.W. 64mm; Ta.W. 62mm; Pt.Max.W. 59mm; Ta.Th. 10mm; Bl.Th. 9mm
Class 2. Complete flint dagger with tip. Manufacture technique refined. Tang edges very tapered, butt end rounded. Scaled retouch covers both faces. Two pairs of notches along tang edges. Possibly resharpened. Wear comprises minimal flaking along blade edges, irregular areas of handling polish on blade faces, heavy rounding along tang edges and arrises on tang faces. Arrises ground and polished on blade faces. Dark criss-cross lines of residue from binding near notches. Brownish discolouration near butt end likely also linked to hafting. Fully corticated white flint. Surface glassy and matte. Totally opaque. Largely homogeneous, but
poor quality with many small inclusions and voids on the surface. Porous chalky cortex makes up much of the base end of the piece, areas of grinding and polishing around the butt.

Single find in buried soil under and cairn but not associated with other objects or skeletal material.

Cantrill 1898; Green et al 1982; Grimes 1932 (Cat. No. 7); Grimes 1951; Savory 1980

150. Ffair Rhos (Bryn’reithin), near Tregaron, Ceredigion, Wales
NMW (78.34 H)
L. 158mm; Ta.L. 71mm; Bl.W. 55mm; Ta.W. 51mm; Pt.Max.W. 76mm; Ta.Th. 7mm; Bl.Th. 11mm
Class 3. Near complete broken flint dagger, tip missing. Manufacture technique refined. Tang edges somewhat tapered, butt end flat. Scaled retouch covers both faces. Lenticular in profile, thicknesses irregularly to one tang edge. Unresharpened but blade edge appears to have been retouched subsequent to breakage near tip. Wear comprises minimal flaking along blade edges, rounding along tang edges and handling polish at the junction of blade and tang. Microscopic analysis revealed polished and striations consistent with storage in a leather sheath (Green et al. 1980) and a tiny area of residue and fibres near the butt end likely linked to hafting. Light brownish grey flint irregularly mottled with white. Surface glassy and shiny, fully translucent. Homogeneous with only a few white linear features. No cortex present.

Single find on the surface.
Green et al 1982

151. Merthyr Mawr Warren, near Candleston Castle, Bridgend
NMW (37.232.1)
L. 146mm; Bl.L. 71mm; Ta.L. 73mm; Bl.W. 31mm; Ta.W. 33mm; Pt.Max.W. 87mm; Ta.Th. 12mm; Bl.Th. 14mm
Possibly a hilted Scandinavian style dagger. Complete flint dagger with tip. Manufacture technique rather crude. Appears unfinished, but probably less heavily worked due to poor quality of raw material. Tang edges parallel, butt end irregular but largely flat. Scaled retouch invasive on both faces, tang area barely knapped to shape. Rather oval and thick in profile. Possible ground and polished facet near butt along one edge. Possibly resharpened. Wear comprises flaking along blade edges, handling polish on both blade faces, rounding on both tang edges and faces. Some striations from manufacture polishing present on one blade face. Fully corticated greyish–ivory flint (not ‘local chert’; contra Savory 1980) makes up part of blade, the rest of the blade and the entire tang are chalky, porous cortex. Flint surface somewhat granular and matte. Totally opaque. Highly inhomogeneous.

Single find
Green et al. 1982; Grimes 1951; Savory 1980

152. Norfolk?
Norwich Castle Museum (1908.22 (74))
L. 120mm; Bl.L. 66mm; Ta.L. 53mm; Bl.W. 21mm; Ta.W. 20mm; Pt.Max.W. 51mm; Ta.Th. 11mm; Bl.Th. 9mm
Scandinavian hilted dagger. Complete flint dagger with tip. Manufacture technique refined. Hilt edges parallel expanding to fishtail base which is rounded. Sub-parallel oblique retouch present on one face, scaled retouch covers the other. In profile, thicknesses noticeably to hilt. Possibly resharpened. Wear comprises flaking along blade edges, heavy polishing and rounding along hilt edges and faces and on base. Very fine pale brownish–grey flint. Surface very glassy and shiny. Somewhat translucent. Homogeneous with a single matte, chalky inclusion which was too tenacious to knap across. No cortex present.

No contextual information available.
Clark 1932

182. Stoke Ferry (Wissey), Norfolk
CMAA (1928.525 & 1928.776)
L. 94mm; Bl.W. 40mm; Ta.W. 44mm; Ta.Th. 11mm; Bl.Th. 10mm
Fragment of the middle of a flint dagger broken in two. Manufacture technique refined. Somewhat asymmetrical. Scaled retouch covers both faces. Lenticular, if rather uneven, in profile, thicker at one edge than the other. Resharpened. Wear comprises flaking along blade edges, handling polish on both blade faces, rounding along tang edges and polished arrises on tang faces. Potentially a sickle or other knife, but appears to have a double-edged blade. Variegated grey flint. Surface somewhat granular and matte. Totally opaque. Somewhat inhomogeneous with a few large inclusions which appear to have been polished smooth and may have been used as part of a grip or to secure hafting. Possible area of cortex on one face.
Single find during river dredging, each part found separately.

183. Burgh Castle (Gariannonum/Garannum), Norfolk
Norwich Castle Museum (506.974)
Norfolk HER (10471)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF10471&resourceID=1002
Fully corticated white flint dagger.
Single find on the surface.

184. Hopton on Sea, Great Yarmouth, Norfolk
Unknown collection
Norfolk HER (39530)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF43176&resourceID=1002
L. 129mm; Bl.L. 68mm; Ta.L. 61mm; Bl.W. 47mm; Ta.W. 42mm; Pt.Max.W. 45mm; Ta.Th. 13mm; Bl.Th. 10mm
Single find.
185. Mundham, Norfolk
Unknown collection
Norfolk HER (28342)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF28342&resourceID=1002
Fragment of a probable flint dagger. Dark grey–black flint with traces of iron staining. Partially patinated. A few small white inclusions.
Single find during metal detecting.

186. Hall Farm, Newton Flotman, Norfolk
Unknown collection
Norfolk HER (10087)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF10087&resourceID=1002
No morphological information available.
Single find on the surface.

187. Ketteringham, Norfolk
Unknown collection
Norfolk HER (28163)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF28163&resourceID=1002
No morphological information available.
Single find during metal detecting.

188. Wretham, Breckland, Norfolk
Unknown collection
Norfolk HER (9000)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF9000&resourceID=1002
No morphological information available.
No contextual information available.

189. The Lodge, Lynford, Breckland, Norfolk
CMAA (1901.81)
Norfolk HER (34666)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF38771&resourceID=1002
L. 57mm; Ta.W. 39mm; Pt.Max.W. 52mm; Bl.Th. 8mm
Fragment of the blade of a flint dagger with tip. Manufacture technique refined. Scaled retouch present on both faces, sub-parallel oblique retouch present on one face. Lenticular in profile. Possibly resharpened. Wear comprises flaking along blade edges and handling polish on blade faces. Variegated light brown flint mottled with tiny black and white speckles. Partially corticated on one face with pale blue and white colouration present. Surface glassy and shiny. Translucent. Homogeneous with only one rough, matte inclusion which does not affect the object form. No cortex present.
No contextual information available.

190. Brick Kiln Farm, Weeting with Broomhill, Breckland, Norfolk
Norwich Castle Museum [not located]
Norfolk HER (14950)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF14950&resourceID=1002
No morphological information available.
No contextual information available.

191. Field Barn, Weeting with Broomhill, Norfolk
Unknown collection
Norfolk HER (4994)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF4994&resourceID=1002
No morphological information available.
No contextual information available.

192. Hockwold Heath, Hockwold cum Wilton, Norfolk
Unknown collection
Norfolk HER (14781)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF14781&resourceID=1002
No morphological information available.
Single find.
Healy 1980
193. Little Oulsham, Feltwell, Norfolk
Lynn Museum, King's Lynn (2005.74)
L. 149mm; Bl.L. 71mm; Ta.L. 78mm; Bl.W. 52mm; Ta.W. 49mm; Pt.Max.W. 49mm; Ta.Th. 11mm; Bl.Th. 8mm
Class 3. Complete flint dagger with tip. Manufacture technique refined. Tang edges somewhat tapered, butt rounded with a point. Scaled retouch covers both faces. Lenticular in profile, but slightly convex. One possible pair of notches along tang edges, but they might be products of post-depositional flaking. Three ground and polished facets on the base of the tang. Resharpened. Wear comprises flaking along blade edges, handling polish on blade faces, rounding on tang edges and polished arrises on tang faces. Variegated brownish-grey flint with darker linear bands. Surface somewhat granular and shiny. Opaque. Inhomogeneous with many small white inclusions which were obviously tenacious and may have resulted in the slight concavity of the blade. No cortex present.
Single find during ploughing of an apparent flint processing area.

194. Heath Farm?, Feltwell, West Norfolk
Norwich Castle Museum (Lost)
Norfolk HER (14592)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF14592&resourceID=1002
No morphological information available.
No contextual information available.

195. Curtis Field 5, Feltwell, Norfolk
Unknown collection
Norfolk HER (5162)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF5162&resourceID=1002
No morphological information available.
Single find during fieldwalking on a Burnt Mound.

196. Feltwell, Norfolk
Private collection (Secker coll. 202)
Norfolk HER (5192)
L. 104mm; Bl.L. 54mm; Ta.L. 50mm; Bl.W. 45mm; Ta.W. 40mm; Pt.Max.W. 44mm
Class 3. Complete flint dagger. Tang edges very tapered, butt end flat. One pair of notches along tang edges and one further unpaired notch on one tang edge. Possibly resharpened.
Single find.

197. Feltwell, Norfolk
Unknown collection
Norfolk HER (14640)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF14640&resourceID=1002
No morphological information available.
Single find in a field.

198. Feltwell, Norfolk
Norwich Castle Museum (1963.203)
Norfolk HER (5163)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF5163&resourceID=1002
L. 136mm; Bl.L. 76mm; Ta.L. 60mm; Bl.W. 38mm; Ta.W. 40mm; Pt.Max.W. 76mm; Ta.Th. 7mm; Bl.Th. 9mm
Single find on the surface.

199. Feltwell, West Norfolk
Mildenhall Museum
Norfolk HER (29999)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF29999&resourceID=1002
Fragment of a flint dagger.
No contextual information available.
A:31

200. Feltwell/Hockwold Cum Wilton, Norfolk
Unknown collection
Norfolk HER (5160)
No morphological information available.
No contextual information available.

201. Hockwold cum Wilton [near Blackdyke Farm], Kings Lynn and East Norfolk, Norfolk
Private Collection
Norfolk HER (MN60755)
URL: http://finds.org.uk/database/artefacts/record/id/113566
L. 171mm; Bl.W. 50mm
Single find.
Minter 2005

202. Hockwold cum Wilton [Little Ouse], Norfolk
Unknown collection
Norfolk HER (5387 & 16590)
Single find in river dredging.

203. Wilton Bridge (Little Ouse), Hockwold, Norfolk
CMAA (1944.1)
L. 140mm; B.L. 70mm; Ta.L. 70mm; Bl.W. 36mm; Ta.W. 35mm; Pt.Max.W. 70mm; Ta.Th. 10mm; Bl.Th. 11mm
Single find in river dredging.

204. White Dyke farm, Hockwold cum Wilton, Norfolk
Unknown collection
Norfolk HER (20834)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=20834&resourceID=1002
Fragment of a flint dagger.
Found on a burnt mound alongside but not directly associated with pot boilers, a quern and flint tools of many periods including barbed-and-tanged arrowheads.

205. Ferry Bank Farm, Southery, Norfolk
CMAA (1965.116)
Norfolk HER (2563)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=2563&resourceID=1002
L. 121mm; Ta.L. 73mm; B.L. 66mm; Ta.W. 55mm; Ta.Th. 9mm; Bl.Th. 7mm
Single find during digging.

206. Brandon Creek, Southery, Norfolk
Norwich Castle Museum (2008.198)
L. 150mm; B.L. 64mm; Ta.L. 86mm; B.W. 55mm; Ta.W. 54mm; Pt.Max.W. 46mm; Ta.Th. 10mm; Bl.Th. 10mm
Class 3. Complete flint dagger with tip. Manufacture technique refined. Tang edges very tapered, butt end rounded but with a point. Scaled retouch covers both faces. Lenticular in profile. Ground and polished facet at base. Resharpened. Wear comprises flaking along blade edges, some traces of grinding on one blade face, rounding along tang edges and black residue present on tang
edges. Light grey flint with darker area at centre. Surface granular and matte. Totally opaque. Somewhat inhomogeneous with a few pale grey, rough inclusions which do not affect the object form. No cortex present. No contextual information available.

207. Pulham Market, Norfolk
Lost
Norfolk HER (19005)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF19005&resourceID=1002
L. 230mm; Somewhat dubious due to large size.
Single find in field walking.

208. Thetford Parish, Norfolk
Unknown collection
Norfolk HER (5803)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MNF5803&resourceID=1002
No morphological information available.
No contextual information available.

209. Somerleyton, Ashby and Herringfleet, Waveney, Suffolk
Unknown collection
Suffolk HER (ASY 006)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MSF18113&resourceID=1017
Fragment of blade of flint dagger with tip.
Single find during field walking.

210. Reydon, Southwold, Suffolk
Southwold Museum
No morphological information available.
Single find in a ploughed field.
Anon. 2009

211. Eye, Suffolk
Unknown collection
Suffolk HER (EYE 006)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MSF3976&resourceID=1017
Fragment of a flint dagger.
No contextual information available.

212. Fakenham Magna, St Edmundsbury, Suffolk
Ipswich Museum [not located]
Suffolk HER (FKM 001)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MSF2492&resourceID=1017
No morphological information available.
Found in a pit in a gravel quarry with decorated Beaker sherds, flint scraper and bronze ring.

213. Lakenheath [Undley], Forest Heath, Suffolk
CMAA (Z 32555 [not located])
Suffolk HER (LKH Misc)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MSF9699&resourceID=1017
Fragment of a flint dagger.
No contextual information available.
Grimes 1932 (Cat. No. 96 – as Undley)

214. Lakenheath, Forest Heath, Suffolk
CMAA (Z 24165 [not located])
No morphological information available.
No contextual information available.

215. Lakenheath, Forest Heath, Suffolk
CMAA (1902.98)
L. 109mm; Ta.L. 65mm; Bl.W. 62mm; Ta.W. 50mm; Ta.Th. 9mm; Bl.Th. 7mm
Very little wear which comprises rounding along tang edges. Dark brownish–red patinated flint. Surface very glassy and shiny. Somewhat translucent. Homogeneous with a few small inclusions which do not affect the object form. No cortex present.

No contextual information available.

216. Lakenheath, Forest Heath, Suffolk

CMAA (1908.202 [not located])
Suffolk HER (LKH Misc)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MSF9698&resourceID=1017
No morphological information available.
No contextual information available.
Grimes 1932 (Cat. No. 88)

217. Crossbank Fen, Lakenheath, Mildenhall, Suffolk

Unknown collection
Suffolk HER (MNL 158)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MSF9698&resourceID=1017
No contextual information available.
Owles 1970

218. Burnt Fen, Mildenhall, Suffolk

BM (Sturge.173)
L. 110mm; BL.L. 61mm; Ta.L. 39mm; Bl.W. 41mm; Ta.W. 44mm; Pt.Max.W. 75mm; Ta.Th. 7mm; Bl.Th. 9mm
Class 4. Complete flint dagger with tip. Manufacture technique refined. Tang edges very tapered, butt end pointed. Scaled retouch covers both faces, sub-parallel retouch present on one face. Thickest at midpoint. Unresharpened. Wear comprises irregular areas of crushing on one blade edge, blunting and polishing along the other blade edge, handling polish on one blade face, rounding along tang edges and areas of flaking, grinding and polishing on tang faces. Possibly better understood as a foliate knife. Dark grey flint evenly speckled with white grey circular features. Surface very glassy and shiny. Translucent. Homogeneous. No cortex present.
No contextual information available.

219. Burnt Fen, Mildenhall, Suffolk

BM (Sturge.174)
Suffolk HER (MNL Misc)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MSF9427&resourceID=1017
L. 118mm; BL.L. 64mm; Ta.L. 54mm; Bl.W. 47mm; Ta.W. 48mm; Pt.Max.W. 65mm; Ta.Th. 8mm; Bl.Th. 13mm
No contextual information available.
Grimes 1932 (Cat. No. 94)

220. Sebastopol Farm, Burnt Fen, Mildenhall, Cambridgeshire

Unknown collection
L. 160mm; Bl.W. 69mm; Ta.Th. 8mm
Class 2. Complete flint dagger with tip. Manufacture technique refined. Tang edges very tapered, butt end flat. Two pairs of notches along tang edges and a fifth unpaired notch on one edge. Fully corticated white patination over black flint. Dark brown staining on one face.
Single find potentially associated with bones of a large animal.
Dunning et al. 1958

221. Kennyhill, Mildenhall, Forest Heath, Suffolk

CMAA (1898.124/Record 1 [not located])
Described in Museum catalogue as plano-convex with a broken tip.
No contextual information available.
Grimes 1932 (Cat. No. 87)
222. Mildenhall, Forest Heath, Suffolk
Ipswich Museum [not located]
Suffolk HER (MNL 023)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MSF8778&resourceID=1017
Fragment of a flint dagger blade with tip. Fully corticated white.
Single find on a sand ridge.
*Owles 1970*

223. Mildenhall, Forest Heath, Suffolk
Unknown collection
Suffolk HER (MNL 307)
URL: http://www.heritagegateway.org.uk/Gateway/Results_Single.aspx?uid=MSF11711&resourceID=1017
Fragment of the tang of a flint dagger.
Single find on the surface of a field.

Hilted Scandinavian dagger. Near complete flint dagger, tip missing. Manufacture technique somewhat refined. Hilt edges parallel, butt end rounded. Parallel and scaled retouch present on both faces. Hilt considerably thicker than blade. Polished facet on hilt face near base. Unresharpened. Wear comprises flaking along blade edges, grinding and polishing along one blade edge and hilt edges, and rounded and polished arrises on hilt faces. Waxy dark blackish–grey flint with areas of bright red and yellow staining (perhaps paint?) near the butt end. Surface very glassy and shiny. Somewhat translucent. Inhomogeneous with many small yellowish–brown matte inclusions. Large area of ground and polished dark brownish–grey cortex at the base end.
No contextual information available.

239. Ipswich (River Orwell), Suffolk
Norwich Castle Museum [not located]
No morphological information available.
Found near or in the River Orwell.

Class 3. Complete flint dagger with tip. Manufacture technique somewhat refined. Tang edges very tapered, butt end largely flat but with a point. Scaled retouch covers both faces. Somewhat plano-convex in profile, thickest at the centre of the blade. Resharpened. Wear comprises flaking along blade edges, rounding and polish on one face, flaking along tang edges, and polished arisses on tang faces. Notches noted by Armstrong (1933) are, in fact, post-depositional damage. Dark grey flint mottled near the top with white. Surface glassy and shiny. Somewhat translucent. Homogeneous with just a few rough inclusions which were occasionally too tenacious to knap. No cortex present.

Single find on the surface.

*Armstrong 1933*

Class 2. Complete flint dagger with tip. Manufacture technique refined. Tang edges somewhat tapered, butt end rounded. Scaled retouch covers both faces. Lenticular in profile, thickest at junction. Two pairs of notches along tang edges. Ground and polished facet at base. Resharpened. Wear comprises flaking along blade edges, irregular handling polish on one face, rounding along tang edges and on tang faces. Variegated grey flint, darkening to base and evenly mottled with white. Surface glassy and matte. Opaque. Homogeneous with only a few inclusions including a large matte one at centre of blade which was too tenacious to knap. No cortex present.

No contextual information available.

313. Chiswick (Thames?), Greater London
MOL (O1033)
L. 164mm; BL.L. 81mm; Ta.L. 83mm; Bl.W. 53mm; Ta.W. 53mm; Pt.Max.W. 81mm; Ta.Th. 9mm; Bl.Th. 8mm
Class 1. Complete flint dagger with tip. Manufacture technique refined. Tang edges somewhat tapered, butt end rounded. Scaled retouch covers both faces. Lenticular in profile, thickens to tang. Resharpened. Wear appears to be largely post-depositional and the result of rolling. Wear comprises crushing and flaking along blade edges, rounding along tang edges and polished arrises on both blade and tang faces. Dark grey flint with some curvilinear black markings and some white mottling on one face. Surface glassy and shiny. Somewhat translucent. Homogeneous with one small inclusion near the tip. No cortex present.
Possibly found in the River Thames.
Grimes 1932 (Cat. No. 63); Smith 1920

Class 3. Near complete flint dagger with tip. Manufacture technique refined. Tang edges very tapered, butt end flat but somewhat rounded. Scaled retouch present on both faces, parallel retouch present on one face and sub-parallel retouch present on the other. Thickness to tang. Three pairs of notches and one unpaired notch present on tang edges. Resharpened. Wear comprises flaking along blade edges, handling polish on both faces, blunting and crushing along tang edges, rounded arrises on tang faces and some irregular flaking near the butt end. Light orangish–brown patination covers variegated grey flint. Surface glassy and shiny. Opaque. Inhomogeneous with several round, totally opaque pale grey inclusions of various sizes which do not affect object form. No cortex present.
Found in the River Thames.

Class 3. Complete flint dagger with tip. Manufacture technique refined. Tang edges somewhat tapered, butt end rounded. Scaled retouch covers both faces. Thickens slightly to centre. Resharpened. Wear comprises flaking along blade edges, rounding and flaking along tang edges, some polishing around the base. Upon excavation, a glutinous substance observed on dagger which is no longer visible. Solid white cortication covers flint surface, somewhat discoloured by iron staining. Surface somewhat granular and matte. Totally opaque. Inhomogeneous with several variably sized matte grey inclusions irregularly distributed throughout the flint matrix and clearly tenacious. No cortex present.
Part of a funerary assemblage in a barrow: Found behind the head of a male crouched inhumation along with a flint striker and iron pyrites.

Class 4. Complete flint dagger with tip. Manufacture technique somewhat refined. Tang edges somewhat tapered, butt end somewhat irregular but rounded. Scaled retouch covers both faces. Lenticular in profile, thickens markedly to tang. Resharpened. Wear comprises flaking along both blade edges, handling polish on both blade faces, rounding on tang edges and polished arrises on tang faces. An unidentified gloss is present on blade edges and one blade face. Tan brown discoloration of blueish-grey flint with black curvilinear features. Surface glassy and matte. Totally opaque. Inhomogeneous with large tan and grey cherty inclusions which were tenacious and led to knapping errors around them. Area of ground and polished off-white cortex on base surrounded by dark black transition zone.

*Annable & Simpson 1964; Cunningham et al. 1896; Evans 1897; Gray 1908; Grimes 1932 (Cat. No. 124); Hoare 1812; Smith 1919*
384. Charterhouse Warren Farm swallet, Charterhouse, Somerset
Unknown collection
L. 164mm; Bl.W. 50mm; Bl.Th. 9mm
Near complete flint dagger, tip missing. Described by Levitan et al. (1988) as finely flaked, slim and lanceolate. Tang edges tapering. Slightly plano convex in profile, thickens slightly to blade. Possibly resharpened or reworked as tip area rounded.
Part of an apparent funerary context within a deliberately sealed layer in a natural swallet: Found with sub-adult human remains, a Beaker, animal bones, five 'sponge finger' stones, a polished black pebble, two hammer stones, a bone pin, an antler spatula and 18 other flint implements.

Class 4. Complete flint dagger with tip. Manufacture technique refined. Tang edges somewhat tapered, butt end flat but with a point. Scaled retouch covers both faces. Lenticular in profile, though more oval at base where it is markedly thicker. Ground and polished facet at base. Resharpened. Wear comprises flaking along blade edges, handling polish at juncture on blade and tang faces and crushing and rounding along tang edges. Dark brownish grey flint with some dark circular features. Surfice very glassy and shiny. Translucent. Homogeneous with only a few tan grey matte inclusions which were not overly tenacious. Very tiny traces of off-white cortex are visible on the ground and polished facet at the base.
Single find in the Glastonbury bogs.

388. west of Glastonbury (bogs), Somerset
Museum of Somerset, Taunton (A.2215)
L. 164mm; BL.L. 84mm; Ta.L. 80mm; Bl.W. 49mm; Ta.W. 47mm; Pt.Max.W. 65mm; Ta.Th. 10mm; Bl.Th. 8mm
Class 3. Near complete flint dagger with tip. Manufacture technique refined. Tang edges somewhat tapered, butt end rounded. Scaled retouch covers both faces. Slightly plano-convex in profile, thickens to tang. Resharpened. Wear comprises flaking along blade edges, handling polish on both blade faces, rounding along tang edges and polished arrises on tang faces. Small facet of striated manufacture polish remains on one face of blade near the edge. Variegated grey flint. Surface very glassy and shiny. Somewhat translucent. Homogeneous with a few matte brown, cherty inclusions which are somewhat tenacious, but do not affect object form. No cortex present.
Single find in the Glastonbury bogs.
Gray 1903; 1908; Grimes 1932 (Cat. No. 82)
389. Wick barrow ("Pixie's Mound"), Stogursey (Stoke-Courcy), Somerset
Museum of Somerset, Taunton (A.941)
L. 136mm; Bl.L. 64mm; Ta.L. 72mm; Bl.W. 50mm; Ta.W. 49mm; Pt.Max.W. 64mm; Ta.Th. 10mm; Bl.Th. 7mm
Class 1. Complete flint dagger with tip. Manufacture technique refined. Tang edges somewhat tapered, butt end flat. Scaled retouch covers both faces. Lenticular in profile, thickens to tang. Two pairs of very shallow notches on tang edges. Heavily resharpened. Very little wear which comprises flaking along blade edges, rounding along tang edges. An area of striated polish is present on one face near an inclusion, perhaps an attempt to remove or reduce it. Cross-cross binding traces present on both faces near notches, somewhat obscured by paper label. Blueish-white cortication covers entire surface. Surface glassy and matte. Totally opaque. Homogeneous with a few rough grey or tan inclusions which are not tenacious.
Part of funerary assemblage under a barrow: Found behind hip of crouched inhumation (?m) along with a flint knife and a Beaker.
