Supplementary Figure 1. Infiltration of intestinal tumors by leukocytes in nontrasplanted \textit{Apc}^{Min+/} mice. A representative section from the \textit{Apc}^{Min+/} mouse small intestine containing a tumor, sectioned and stained with antibodies against the CD45 leukocyte common antigen to assess infiltration of tumor and intestinal tissues by leukocytes. Red, actin; green, CD45 positive cells (leukocytes).

Supplementary Figure 2. Expression of SDF1 in intestinal tumors in nontransplanted \textit{Apc}^{Min+/} mice. A representative section from the \textit{Apc}^{Min+/} mouse small intestine containing a tumor, sectioned and stained with antibodies against the chemottractant cytokine SDF1. Red, actin; green, SDF1.
